Eat and drink - but at the right time!

In our super-busy 21st-century lives, most of us try to do as much as we can in 24 hours. However, we usually do things whenever it suits us, and experts say that this is disrupting our body's natural cycle, making us feel tired at times when we should feel awake, and vice versa. Science shows that by doing things at the right time, we can be happier and healthier.

Have breakfast at 8:00 a.m.

In a recent study, researchers found having breakfast at this time is good for our blood sugar levels, so the food you eat now will give you the energy you need. It's also important not to skip breakfast. Another research team, from Sweden, suggested that people who ate a regular breakfast as teenagers were 32% less likely to be at risk of heart disease as adults.

Don't drink coffee in the morning. Have one at 3:00 p.m.

Most coffee drinkers make a cup as soon as they wake up. However, researchers have suggested that early morning is the worst time to drink coffee because it stops the body from producing the stress hormone cortisol, which we need at this time to help us to wake up. The best time to drink coffee - or caffeine in general - is between 2:00 p.m. and 5:00 p.m., when it can make us more mentally alert, according to a study conducted by the University of Sheffield a few years ago.

Have lunch between 12:00 and 2:00

This is when our body digests food best because this is when the stomach produces the most acid. So it's the ideal time to have your main meal of the day. An experiment by nutritionists at the University of Surrey found that blood glucose levels after an evening meal were much higher than when people had the same meal earlier in the day, and high levels of glucose can cause diabetes.

Have dinner at 7:00 p.m.

Have your evening meal early. It should be delicious - our sense of smell and taste are at their best at this time - but light.

More good times for your body

- Ideally, you should get up when the sun rises. When we see daylight, we stop producing the sleep hormone melatonin and start getting ready for the day ahead.
- Do yoga or go for a walk before breakfast.
- Do important tasks at 11:00 a.m., when your brain is working the best.
- Weightlifting sessions are best done at midday - that's when your muscles are the strongest.
- The best time to run or ride a bike is 5:00 p.m., when your lung capacity - important for endurance sports - is at its greatest.
- Go to bed between 9:00 p.m. and 11:00 p.m. This is when your body temperature starts to go down and the brain begins producing melatonin.

- 1 outgoing, charming, and disorganized
- 2 responsible, ambitious, and anxious
- 3 self-confident, independent, and spoiled
- 4 sociable, sensitive, and unambitious

c Read the article and check your answers.

How birth order influences your personality

Nowadays, it is an accepted fact that our position in the family – that is, whether we're an oldest child, a middle child, a youngest child, or an only child – is possibly the strongest influence there is on our character and personality. So what influence does it have?

The oldest child

Firstborn children often have to look after their younger brothers and sisters, so they're usually sensible and responsible as adults. They also tend to be ambitious and they make good leaders. On the negative side, oldest children can be insecure and anxious. This is because ¹ H.

The middle child

Middle children are more relaxed than the oldest children, probably because ² . They're usually very sociable – the kind of people who get along with everybody. They are also usually sensitive to what other people need because ³ . For the same reason, they're often good at dealing with arguments, and they're always sympathetic to the ones on the losing side, or in general, to people who are having problems. On the other hand, middle children can sometimes be unambitious, and they can lack direction in life.

The youngest child

Youngest children are often very outgoing and charming. This is the way they try to get the attention of both their parents and their older brothers and sisters. They are often more rebellious, and this is probably because ⁴ . They can also be immature and disorganized, and they often depend too much on other people, because ⁵ .

The only child

Only children usually do very well at school because they have a lot of contact with adults. They get a lot of love and attention from their parents, so they're typically self-confident. They're also independent because they spend so much time by themselves. And because ⁶ , they're often very organized. Only children can sometimes be spoiled because ⁷ by their parents. They can also be very selfish and get impatient, especially when things go wrong. This is because ⁸ .

d Read the article again and complete it with reasons A–H.

- A they grew up between older and younger brothers and sisters
- B it's easier for them to break the rules – by the time they were born, their parents were more relaxed about discipline
- C their parents were more relaxed themselves by the time the second child arrived
- D they are given everything they ask for
- E they have always been the baby of the family
- F they spend a lot of time with adults
- G they've never had to deal with problems with other brothers and sisters
- H when the second child was born, they lost some of their parents' attention, and maybe they felt rejected

e Re-read the paragraph that applies to you. Do you think the description of personality is true for you? Are any of the other descriptions true for people you know, e.g., your brothers and sisters, or friends?

7 LISTENING & SPEAKING

b **V** p.154 Vocabulary Bank Money

She rode her bike 120 miles to a wedding, and her lunch budget was just 65¢ a day.

- A** Michelle McGagh, a 34-year-old journalist, had a mortgage of \$290,000 that which she wanted to reduce. Last November, she looked at her finances and she discovered that every year she spent a lot of money unnecessarily – for example, \$2,000 hanging out with friends, \$1,400 in restaurants, and \$500 on coffees. So she made a radical plan – to stop spending money for a year. She continued to pay her internet, gas, and electricity bills, and allowed herself \$40 a week to buy food and household essentials. But she couldn't spend money on anything else – no clothes, no buses or flights, no meals out, no coffees, and no cosmetics.
- B** She cooked large quantities of curry and bolognese sauce, which lasted her a week, and which she ate with rice or pasta. It was cheap and healthy, but also "really boring." She also experimented with homemade cleaning products and beauty treatments, like using vinegar for cleaning or olive oil as moisturiser, but she decided that most of them didn't really work.
- C** At first, she tried to see her friends as often as before. She rode her bike 120 miles to be at a friend's wedding, and camped in their yard to avoid paying for a hotel room. The following weekend, she rode 60 miles to meet friends. But she couldn't join them for dinner in a restaurant, and when they went out, she drank tap water. In the end, she simply went out less, which made her feel more isolated.
- D** Of course, she couldn't afford to travel, so she missed a trip to the beach with friends. Her only vacation was a bike trip where again she camped. Here, for the first and only time in the year, she bought food that she had not cooked herself – French fries for \$2.50.
- E** At the end of the year, she had saved \$29,000. She was much slimmer and in better shape – over the year, she had ridden her bike 6,500 miles. She says she now feels freer and happier because she appreciates the simple things in life. She also gained confidence and a sense of adventure.
- F** But she learned the hard way that you can't really socialize if you don't want to spend money. The evening after her year-long challenge ended, she celebrated by treating her friends to a night out. But she has not gone back to her past spending habits. She occasionally pays to socialize and go on vacation. She has even taken a taxi. But after buying some new clothes and some perfume, she insists, "I have absolutely no interest in buying anything else."
- G** So what's her key tip for those who want to save? "Whenever you open your wallet, think about whether what you are buying is something you need or something you want. We all say, 'I need to buy this.' Most of the time, we want to buy it. Maybe we don't know the difference between needing something and wanting something anymore."

- c Read Helen's blog entries and number them in order, 1–9. Use the highlighted phrases to help you.

The polar challenge

TV host **Helen Skelton** has never been afraid of a charity challenge. She has run the 78-mile Ultra Marathon in Namibia, and she has kayaked 1,198 miles down the Amazon, from Nauta, in Peru, to Almeirim, in Brazil, for the charity Sport Relief, which helps poor and disadvantaged people. Now she has decided to leave the heat of Africa and South America to take part in a polar challenge, a 500-mile ski, kite-ski, and bike journey to the South Pole, the bottom of the world. During the challenge, Helen is writing a blog.

A It's over a month since we arrived in Antarctica, and if everything goes according to plan, we should reach the South Pole late tonight. We've been here for so long it's almost become a routine. We camp, get up, ski, camp, get up, ski. I'm wearing a face mask because of the wind and sun. I may look like Darth Vader, but it will help me get there.

B 1 My first night in Antarctica. It's summer here, and the 24-hour daylight is weird. The plan, until January 3rd, is to train before starting our trek. Today was my first full day on cross-country skis, pulling a sled full of my food, tent, and supplies. It was a nightmare! Still, the scenery was incredible. I'm now going to try out the ice bike for the first time, and we're also going to practice kite-skiing.

C The first day of the trek is over! We managed to make the bikes work! But we need to do a minimum of 25 miles a day, and we only managed 15 miles today. After nine hours of ice-bike riding (and a lot of pushing), we had to stop because I was completely exhausted.

D We've only been in Antarctica for four days, but there's been a huge snowstorm for the past 48 hours. It's freezing outside, so we can't train – we've had to stay in the tent. The winds are 70 miles per hour, with a temperature of -15°C and lots of snow. The visibility is terrible, too. However, we're staying warm and morale is still good.

E This morning, the second day of our trek, we set off on the kite-skis, and right away we were traveling fast. In the first hour, we'd gone eight miles. I thought we could do 60 miles today, but late this afternoon the wind dropped, so we decided to stop and set up camp. But we'd traveled 41 miles – I'm very proud of that. I've only kited a few times before. But I'm trying to complete my challenge in 20 days, and there's still a long way to go...

F We're now only 150 miles from our destination. For the last few days, we've only been using bikes and cross-country skis, not kite-skis. We had a ten-hour day yesterday with the bikes. The morning went well, but then we hit some soft snow and we ended up pushing the bikes for the last six miles. Today, we decided to use skis, but progress has been slow.

G We've completed our 500-mile journey in 18 days! When I talked to Dad on the phone, saying we've done it, I cried. This is the biggest thing I have ever been part of.

H We're on our way to the halfway checkpoint today, where we can have some rest...and I've been promised lots of hot water so I can have a good wash – my second one since arriving in Antarctica. I have to admit it, I smell awful...and my hair is absolutely filthy.

I The training is over and we're starting our 500-mile journey today! We've been bike riding, walking, and kiting for ten days. I washed and changed my clothes. I'm not going to get clean clothes again for three weeks!

d Read the blog again. In which entry does she mention...?

- feeling very emotional
- how beautiful Antarctica is
- looking forward to a wash
- looking like a science fiction character
- not being able to go outside
- stopping bike riding because she was very tired
- stopping using one method of transportation
- having to wear the same clothes every day
- traveling quickly for the first time

The coffee chain Starbucks *only does / has been doing / used to do* charity work in the New York City area.

BY 2020, STARBUCKS PROMISES TO DONATE 50 MILLION MEALS A YEAR

The CEO of Starbucks, Kevin Johnson, recently celebrated an important achievement in New York City. This achievement had nothing to do with introducing a new coffee product or reaching a new sales target high. Instead, the well-known coffee chain revealed that its FoodShare program has been ¹ _____ more than one million meals to food banks around the US. In fact, Starbucks has plans to increase their donation of all unsold, extra food to 50 million meals a year by 2020.

Johnson said the company's in-store employees came up with the idea to give food waste to local food banks. In the US, food is the biggest source of material to ² _____ in landfills and incinerators. Restaurants and grocery chains are responsible for much of this waste, which is unfortunate because nearly 42 million people in the US ³ _____ from food insecurity.

Starbucks is working with Feeding American and City Harvest, two New York nonprofit organizations, to make certain their unsold food isn't ⁴ _____ and will instead be used to feed the needy in the city. Executive director of City Harvest, Jilly Stephens, says that in addition to Starbucks, her organization has also worked with over 2,500 other businesses, including sandwich chain Pret a Manger, to make sure donated foods reach local food banks. However, some people think large restaurant chains ⁵ _____ do more to donate their extra food.

Johnson referred to Starbucks' mission statement when he was asked if the company would ⁶ _____ to be a voice for bigger, social topics. He said, "If you start with our mission statement: to inspire and nurture the human spirit—one person, one cup and one neighborhood at a time. That says it all. Things we can do that are good for the community, good for the country, good for other people—we are going to embrace those. That's not about making some political statement but doing what is ⁷ _____."

Top Gear challenge

What's the fastest way to get across Florida?

On *Top Gear*, a very popular TV series about cars and driving, they decided to organize a race across Florida to find the quickest way to cross a busy state.

The idea was to start from Miami, in the southwestern part of the tip of Florida, and to finish the race at the southern-most point of the US, Key West, a trip of 160 miles. Three possible forms of transportation were chosen: a motorboat, a car, and a combination of transportation. One of the show's hosts, **Rutledge Wood**, took the **motorboat** and his colleague **Adam Ferrera** took the **car** (a 2010 Lotus Evora). **Tanner Foust** took **different kinds of transportation**. His trip involved getting a taxi to the airport where he flew in a seaplane. Then he rented a scooter.

- b Now read about the trips by motorboat and car. Do you still think your predictions in 3a are right?

They set off from Jones Boat Yard on the Miami River...

Rutledge in the motorboat

His trip began in the Miami River. For the first hour there was a speed limit of 7 miles an hour because of the enforced no-wake zone in the river. Once the boat passed through Biscayne Bay and went under the Rickenbacker Bridge, he entered open water. Rutledge increased the boat's speed to over 90 miles an hour and made up the time he lost on the Miami River. Approximately 60 miles from the finish line, Rutledge was ahead of Adam and Tanner, but he had to stop for gas if he wanted to reach the finish line in Key West. In the 15 minutes it took to refuel the boat, Adam passed Rutledge in the car and took the lead. Once Rutledge was back on the open water, there were a lot of big waves, but he was able to pass Adam near Seven Mile Bridge just outside of Key West. Unfortunately for both Rutledge and Adam, Tanner flew over both of them in the seaplane at about the same time. Now Tanner was in the best position to win. Each racer was only miles from the finish line in Key West. Who would win?

Adam in the car

Adam started off OK. He wasn't driving fast because he was going the speed limit. However, after an hour, Adam decided that he was going too slowly. He increased his speed to 75 miles an hour—20 miles an hour over the speed limit. As Adam passed through a small town, he was stopped by the police! They were angry that Adam was speeding, and it meant that Adam lost many valuable minutes! Another problem Adam had was that his GPS was programmed to give directions in Spanish instead of English. This made finding his way to Key West difficult. As Adam finally approached Key West, the traffic was getting worse. He was worried about getting stuck so close to the finish line. Only three miles to go...

- c Read about the two trips again and answer the questions with R (Rutledge) or A (Adam).

Who...?

- 1 went much faster in the later part of his trip
 - 2 did something illegal
 - 3 went more slowly in the later part of his trip
 - 4 had to stop for more gas
 - 5 couldn't understand the directions spoken by the GPS
 - 6 was in the lead for most of the race
- d Look at the highlighted verbs and verb phrases. With a partner, figure out their meaning from context.

Now listen to what happened to Tanner. Follow his route on the map.

- f 3.11 With a partner, write down the order in which you now think the three people arrived. Now listen to what happened. What order did they arrive in?
- g Think of your nearest big city. What kind of public transportation is there? If a race was organized there between a bike, a car, and public transportation, what order do you think they would

Glossary

1 mile the unit of distance used in the US and the UK (=1.6 kilometers); 160 miles = 257 kilometers

seaplane an airplane that can take off from the water or the land

no-wake zone an area of water where boats must travel slowly to avoid making waves

- 1 What's the **quicker** way to get around Miami?
- 2 Driving is **more boring** than going by train.
- 3 The boat was almost as fast **than** the bike.
- 4 West Hollywood is about the same distance from Los Angeles **as** South Gate.

c Talk to a partner. Compare the three things in each group using the **bold** adjective, e.g., for 1, decide which is the most dangerous, and then compare the other two. Say why.

- 1 **dangerous** bike riding
driving
riding a motorcycle
- 2 **easy** learning to drive
learning to ride a bike
learning to ride a horse
- 3 **relaxing** driving
flying
traveling by train
- 4 **difficult** sleeping on a bus
sleeping on a plane
sleeping on a train
- 5 **boring** being stuck in a traffic jam
waiting at an airport
waiting for a bus

I think bike riding is the most dangerous because sometimes drivers don't see bikers. Riding a motorcycle is more dangerous than driving.

Two scientists at Virginia Tech have published a book called *Survive the Drive*. In it, they describe their research on the most distracting things you can do when you are driving. They fitted video cameras and other devices to the cars of more than 3,500 drivers who were between the ages of 16 and 98. They then recorded their driving for three years and they got millions of hours of video. During this time, the drivers had more than 900 accidents, and the researchers used the video to analyze exactly why they happened.

Linking

We often link words together in English, especially when we speak fast. Being familiar with when we link words will help you understand the individual words in fast speech. We link words:

- 1 when a word ends in a consonant sound and the next word begins with a vowel sound, e.g., *the most interesting.*
- 2 when a word ends in a consonant sound and the next word begins with the same consonant sound, e.g., *the worst time.*
- 3 when a word ends in /t/ or /d/ and the next word begins with /t/ or /d/, e.g., *the biggest danger.*

b 3.15 You're going to listen to an interview with a traffic safety expert. First, read the information box above. Then listen and complete some extracts with linked words from the interview.

- 1 What's the _____ thing you can do while you're driving?
- 2 ...you'll probably make _____
- 3 ...people slow down to _____
- 4 ...this is a really common _____ freeways.
- 5 This makes you _____ likely to _____.
- 6 _____ you find _____?
- 7 ...always keep _____ the road!

likely

likely is an adjective. We use it to talk about probability, e.g., *This is very distracting and makes you more likely to lose control of the car.*

- c 3.16** Now listen to the interview. Number the activities in a 1–8. Were your top three correct?
- d** Listen again. Note down a number or fact about each dangerous activity.
 - 1 feeling emotional *ten times more likely to have an accident*
- e** Are you surprised by any of this research? Which of the things are you (or drivers you know) most likely to do when driving?

6 SPEAKING

a Look at the statements below. Check (✓) the ones you agree with and cross out (X) the ones you disagree with. Think about your reasons.

People who drink and drive should lose their driver's license for life, even if they did not cause an accident.

Slow drivers cause more accidents than fast drivers.

Speed cameras do not stop accidents; they just make money for the government.

Drivers who are over 70 are as dangerous as young drivers.

Bike riders in cities should only be allowed in bicycle lanes, not where cars and other vehicles drive.

It should be illegal to eat or drink when you're driving.

The minimum age for riding a motorcycle should be 25.

The speed limit on freeways should be lower.

b In groups, take turns giving your opinions on a statement in a. Do the others in the group agree or disagree with you? Use the language from the **Giving your opinion** box.

Giving your opinion

Personally, I don't think it should be illegal to eat and drink while you're driving because...

In my opinion, bike riders should be allowed to ride their bikes on all roads...

Common stereotypes about men and Women – but are they really true?

Scientists and psychologists say that there are certain gender stereotypes that they have **proved** are true, for example, a recent academic study **found** that men are better at assembling IKEA furniture than women! But can we *really* believe the results of these studies? Here are five more stereotypes that researchers claim are true.

1 _____

Scientists in Norway asked 18 men and 18 women to find their way through a virtual maze, completing various tasks along the way. Men were able to solve 50% more of the problems than women in the same time. "Men's sense of direction was more effective. They simply got to their destination faster," said Dr. Carl Pintzka of the Norwegian University of Science and Technology.

2 _____

Researchers from the University of Maryland separated baby rats from their mothers and **discovered** that baby rats with more FOXP2, a kind of protein necessary for the development of speech and language, made more noise and called to their mothers more often. Moving on to humans, scientists then discovered that women have 30% more FOXP2 than men.

3 Australian researchers gave 20,000 men and women a list of questions to answer, to discover how they feel if their partner has a problem. Women said they were very affected, but men showed no change. "It is not that men are unemotional, but they simply are not very emotional when it comes to the feelings of their partner," said the study's author, Dr. Cindy Mervin.

4 Psychologists at the University of Herefordshire gave 50 male and 50 female students eight minutes to perform three tasks at the same time: math problems, finding restaurants on a map, and drawing a plan for finding a lost key in a field. To make it more difficult, they were asked some general knowledge questions while they worked. The women, **it turned out**, easily did all four things at once, but not the men – so it seems that this old cliché is true.

5 Professor Laura Mickes and a team of psychologists from the University of California asked men and women to write captions for cartoons in *The New Yorker* magazine. Without knowing the author, a group of male and female judges preferred the men's jokes. The psychologists **argued** that men use humor to attract women, who in turn are attracted to men with a good sense of humor.

And some that aren't true...

For every stereotype verified by science, many others turn out not to be true. Recent research **shows**, for example, that women are just as competitive and aggressive as men, better at driving, and no worse at mathematics. Men, on the other hand, are more insecure in relationships, make worse bosses, and are more likely to panic in stressful conditions.

Adapted from the Daily Telegraph

f Many people would disagree that these five stereotypes are true, in spite of the research. What do you think? With a partner, think of more stereotypes about men and women and discuss if you think they're true or not.

You have just ruined one of the most beautiful passages of one of the most beautiful works ever written." The phone owner got up and quickly left the hall.

Good for him. It's time people protested against this kind of behavior. If people can't live without their phones for two hours, ¹they shouldn't go to concerts. We need a new rule for concert halls and theaters: ²you have to leave your phone, or any other device, at the coat check, similar to the way you have to check most bags and backpacks in museums. And the same for the movie theater!

REPLY cassie December 23 5:30 pm

Great idea. I would also add another rule: if you are caught with a mobile device in the auditorium, ³you must immediately pay a fine!

REPLY ahmet December 23 7:43 pm

If you ban cell phones from concerts, you'll lose a lot of the audience. There are people who have work phones, and their companies tell them ⁴they must not give their phones to anyone, because of company IT policies.

REPLY louisa December 24 1:16 am

I think all concert halls ⁵should block cell phone reception. Reception could be available until right before the concert begins, during the intermission, and immediately after it finishes.

REPLY matteo December 24 7:08 am

Blocking reception wouldn't solve the problem. Often when cell phones go off, it's an alarm that the owner has forgotten was on, which ⁶doesn't have to have reception to go off.

The *Handbook* receives more than 10,000 requests for etiquette information a year. Jo Bryant, editor of the *Handbook*, said, "The number of requests we receive demonstrates that manners are still hugely important to people. The key is to always consider those around you."

The most frequently asked questions have changed a lot over the years. In 1994, one of the most common questions was "What should you do if you meet the Queen?" and in 2004, people asked, "Is it acceptable to ask for money as a wedding present?"

Debrett's has given us a preview of its latest guide to good manners, which answers some of the questions that most trouble the public today.

SOCIAL GREETING: KISSING

Many people are unclear on the subject of social kissing. Debrett's advice is that kissing is not appropriate in many professional situations. On the whole, it should only be used among friends, but not on a first meeting. An air kiss, without contact, may seem rude or impersonal, so very slight contact is best, but no sound effects are needed.

EATING AND PUTTING ON MAKEUP ON PUBLIC TRANSPORTATION

According to Debrett's, you should avoid both. It's inconsiderate to eat smelly food in a closed environment, and applying makeup on public transportation makes you appear disorganized.

RECLINING YOUR SEAT ON AIRPLANES

This is a common problem. Debrett's says that it's selfish to recline your seat during short daytime flights. When traveling by plane, always stay within your own space and don't monopolize the armrest. Also avoid kicking the back of the seat in front of you, or using it to help you stand up.

GIVING UP YOUR SEAT ON PUBLIC TRANSPORTATION

While pregnant in 2016, actress Olivia Wilde was so disappointed that no one offered her a seat on the NYC subway that she posted on Twitter to complain. According to Debrett's, passengers should always offer to give up their seat to any individual who is pregnant, elderly, or clearly in need. It is important to remember, however, that it is also rude to aggressively decline the offer of a seat.

EATING BEFORE EVERYONE IS SERVED

The final question is one that we've all asked ourselves: is it rude to start eating at the table before everyone else has been served? Debrett's says that the simple answer is yes, unless the host or hostess (or in a restaurant, the other diners) gives their permission for people to start.

3 LISTENING

- a Read the text. Do you believe Malcolm Gladwell or Josh Kaufman?

Learn a new skill in 20 hours

It was Malcolm Gladwell, the popular writer on modern psychology, who popularized the idea that it takes 10,000 hours of practice to really master a new skill, such as playing the piano. But in this non-stop world, who has that kind of time? In his book *The First 20 Hours*, Josh Kaufman tells you how to learn any new skill really quickly. By completing just 20 hours of focused practice, you'll be able to go from knowing absolutely nothing to performing well. But is it really possible? Matt Rudd, a *Sunday Times* journalist, decided to give it a try.

- b Read about Matt's past experience of learning the trumpet. Why do you think he gave up so fast?

Matt Rudd learns the trumpet

6 READING & SPEAKING

- a How long have you been learning English? Has anyone ever given you a useful tip that has helped you learn?
- b Read some tips on a forum for learning English outside class. Do you do any of these things?

Does anyone have any good tips for practicing English outside class? I'm an intermediate-level learner (I think – I hope!) and I'm studying in Colombia...

Nelson, Medellin

Comments

- 1 One very easy thing you can do is to change the language to English on your phone, laptop, or tablet. That way, you're reading English every day and you learn a lot of vocabulary without really noticing – for example, the things you see on your screen. I've found it really helpful.
Sara, Brazil
- 2 My tip is to do things that you already like doing, but in English. So, for example, if you're interested in a sport or in photography, read about it in English. If you like movies, watch them in English with subtitles. I'm interested in jazz, so I read magazines and articles online in English. For me, it's better than reading books.
Min-ho, South Korea
- 3 The thing that really helped me to improve my English was having a Canadian boyfriend. He didn't speak any Turkish, so we spoke English all the time, and I improved really quickly. So my tip is: try to find an English-speaking boyfriend or girlfriend!
Hazal, Turkey
- 4 I think that learning vocabulary is very important, so I got a vocabulary app for my phone. It has a lot of useful words, all in categories, but it also lets me add my own words and phrases, too. The best thing is that I can test myself whenever I get a quiet moment, like on the bus, and it just takes a couple of minutes.
Kento, Japan
- 5 My tip is to learn to sing songs in English. First, I find the words online and try to understand them. Then I go to YouTube and sing along with the singer and try to copy the way he or she sings – great for your pronunciation. Then, when I can do it well, I get a karaoke version of the song and I sing it. It's fun, and my English has improved.
Sofia, Argentina
- 6 Practice saying things in your head. It could be anything – you could describe your job or your vacation plans, or talk about yourself or your family, or what's happening in the news. Then, when you really need to speak English, it's easier because you've done it in your head. (I do this on the way to my English class every week.)
Marta, Mexico

c Read the tips again and match them to something that you think the person has learned to say in English.

All you need is love, love. Love is all you need.
 Are you sure you want to shut down your computer now?
 Why don't we stay in and watch a movie tonight, honey?
 I work for Samsung. I'm a computer programmer. I've been working there for three years.
 outgoing – shy
generous – cheap
friendly – unfriendly
 Jazz musician Esperanza Spaulding will give a concert in her hometown of Portland, Oregon next month.

d Look at two sentences with reflexive pronouns from the tips in b. How do you say them in your language? Then read the information box.

- I can test myself whenever I get a quiet moment.
- ...talk about yourself or your family...

Reflexive pronouns

We use reflexive pronouns (*myself, yourself, etc.*) when the object of a verb is the same as the subject. We can also use reflexive pronouns to emphasize the subject of an action, e.g., *I painted the kitchen myself.*

e Which subject pronouns do these words go with?

themselves herself ourselves yourselves
himself itself

f **4.20** Listen and say the sentences with different pronouns.

- She's cut herself. You... (You've cut yourself.)

g Talk to a partner.

- Which of the tips in b do you think are the best for learning English? Are there any you don't think would work for you?
- Are there any tips that you could easily put into practice?
- What other things do you do to improve your English outside class (e.g., visit chatroom websites, listen to audiobooks)?

How to be the perfect car passenger

With the holiday season just about to start and millions of cars hitting the roads at once, now's the time to consider how car passengers can help drivers. Think about how you would like your passengers to behave if you were the driver – this will make you more conscious of your actions while being a passenger yourself.

A

Don't wait for the driver to tell you to put it on, or refuse to put it on when asked to.

B

Advise the driver on the best route to take. However, don't shout or advise them too close to a turn because this can make the driver panic or turn suddenly, leading to a possible accident.

C

You can always comment on someone's driving, as long as it's a friendly suggestion. But don't attack the driver about their driving, especially if they're inexperienced. Let them take their time and drive the way that is most comfortable for them, not you.

D

Talking to the driver helps to pass the time and stops them from falling asleep. However, talking too loudly or singing along to the radio can distract the driver and possibly cause an accident.

E

Listening to the radio while driving makes the trip more enjoyable. However, don't assume that the driver wants to listen to everything that you want to listen to. It's better to allow the driver to choose the style of music. If the driver needs to concentrate, help them by turning the volume down, and don't have the radio on too loud in general.

F

You deserve to feel safe and be treated with consideration. If you notice that the driver is going above the speed limit, don't immediately shout at them because they might not be aware of it themselves. However, if you can see that the driver is speeding and not driving safely, you should tell them to slow down and drive more carefully.

- Paragraph 2:**
lucky golf balls and lucky charms
- Paragraph 3:**

- Paragraph 4:**
two players with the same superstition
- e Talk to a partner.
- Do you know of any other athletes who are superstitious? What do they do?
 - Do you have any superstitions, e.g., when you are playing or watching sports, or when you take an exam, or when you travel?

Do "lucky socks" really work?

"I'm not superstitious either, but those were the days Harris wore his lucky socks."

- 1 **S**ports have always been full of superstitions, even for the best athletes in the world. Long-distance runner Mo Farah always shaves his head before a race. Judo star Kayla Harrison always wears the lucky socks that were a gift from her grandmother. Soccer player Cristiano Ronaldo always steps onto the field with his right foot first. And tennis legend Serena Williams always bounces the ball five times before a first serve, and twice before a second serve.
- 2 **Do actions like this have any real effect on sports results?** According to a study by the University of Cologne, it seems that they can increase confidence and a sense of control, which might help athletes. The study showed that people who were given a golf ball that they were told was "lucky" played better than those who used a "normal" ball. And it isn't just sports. In another experiment, people who were allowed to carry their lucky charm performed better at memory tests than people without one. The researchers concluded that superstitions make people feel more confident, which makes them perform better.
- 3 **Superstitions may also have a positive physical effect.** Dan Abrahams, a sports psychologist, says that sporting rituals can cause the release of adrenaline and other chemicals that help the athlete to focus better.
- 4 **Most psychologists, however, say that superstitions can be bad as well as good.** Abrahams tells the story of a professional soccer team where two players had the same superstition – they both had to be the last person to leave the locker room before the game. They couldn't agree how to solve the problem, and it had a really negative effect on them and on the team. And what happens if you sit down to take an exam and realize you've forgotten your lucky pen?

6 GRAMMAR past tenses

a Read the article about Alistair Brownlee. What did he do?

b Paragraph 2 tells the story of what happened. Most of the verbs are simple past, but there are two examples of the past continuous, and four of the past perfect. Can you find them? Why are they used?

Alistair sacrifices gold... to help his brother

Nobody will remember who won the world triathlon in Cozumel, Mexico, in 2016. Instead, they will remember the sacrifice of Alistair Brownlee, who stopped to help his brother, Jonny, instead of winning the gold medal himself.

As Jonny, 26, entered the last kilometer of the 10-km run, he was winning by a lot – he'd gone very fast in the swimming and bike riding stages. But then he began to feel sick because he hadn't drunk enough in the hot conditions, and he stopped at the side of the road. His brother, Alistair, was running behind him, but when he saw that Jonny had stopped, he didn't run past him to win the race. Instead, in a wonderful act of brotherly love, he took his brother's arm and helped him to run the final few hundred meters. Seconds before they reached the finish line, South African Henri Schoeman, who had been behind them until then, ran past them both and won the gold medal.

Alistair said, "It was a natural human reaction to my brother, but for anyone, I would have done the same thing."

Tiffany's story

♥ THE WAY WE MET

Three years ago, I stopped at the supermarket on my way home from work to get some food. After checking out, I walked out of the store and pressed the unlock button on my car keys to open my white Jeep Cherokee. But as I got closer, I noticed the rear door on the passenger's side was already open and there was a guy standing beside it. At first, I thought he was trying to steal my car, or rob me. But when I got a little closer, I noticed he was actually unloading his shopping bags into the car. I was scared. I went up to him nervously and said, "Um, hi." He said, "Hi," and looked at me in surprise while he continued to unload his bags. Then I said, "Um, this is my car." He laughed at me as if I was crazy and replied, "No, it isn't, it's mine." So I pressed the lock button on my car keys to show him that it was definitely my car. His face turned white.

Kristina's story

♥ THE WAY WE MET

I came to New York to earn a master's degree in creative writing. Matt was a personal trainer, and he was studying for his doctorate in Chinese medicine at another university in New York. At the time, I used to do a lot of running – I'd run two marathons – and I started to get really bad back pain. I saw lots of doctors, and they all said different things, like "do yoga" and "maybe you need an operation." None of them knew what was wrong. The final one suggested acupuncture, so I thought I'd try it as a last resort. When I walked into the clinic for the session, I saw Matt. He was the acupuncturist. The moment we looked into each other's eyes, we connected. But he didn't ask me out; he was very professional. At my last session, I asked him how old he was. He said he'd be 29 the following week, but that he wasn't going to celebrate because he had to study.

1 READING

a Look at the definition of an extra and the photos in the article. In pairs, can you think of three negative things about being an extra?

extra /'ekstrə/ n. a person who is employed to play a very small part in a movie, usually as a member of a crowd

c Read the article again. Complete the paragraph headings with words from the list.

expensive **miming** **ordinary**
patient **real** **secrets** **weather**

b Read the article. Are your ideas mentioned?

The world of extras

Without extras, most movie and TV scenes would be empty and unrealistic. But while we're obsessed with movie stars, we never hear much about the extras, because, of course, that's their job – not to be noticed. So what is the world of extras really like?

1 They have to be _____.

Days on set can be very long, sometimes lasting more than 15 hours. A lot of that time is spent just sitting around, waiting to be used in a scene, or repeating a single shot a dozen times. Extras usually spend their "waiting time" reading or playing cards. "There are days you get to the set and you wait and wait, but you aren't used," says Amy Rogers, a regular extra in TV shows, including *Homeland*.

2 They need to be good at _____.

Extras often need to make a scene appear alive and busy, while at the same time remaining totally silent so as not to interfere with the actors' dialogue. This means they have to pretend to have a conversation without actually making any noise. Also, dance scenes are often filmed in silence and the music is added in later. When a crowd scene was being filmed for the movie *Jersey Girl*, the extras had to pretend to clap and cheer. But it was all done in silence, and when they clapped, their hands never touched.

On the set of Bollywood movie *Nayak*

3 They have to put up with all kinds of _____.

Sometimes, when a winter scene is being filmed, and all the extras are wearing thick jackets and hats and gloves, it's actually 85 degrees and the snow is fake. You can tell whether it's really cold if you can see the breath coming out of people's mouths. Also, when scenes are being filmed inside during the summer, the air conditioning has to be turned off because of the noise.

4 They have to be able to keep _____.

Phones aren't allowed on set, and photos are strictly forbidden. While the movie *Insurgent* was being made, one extra took a photo of the set and posted it online. Since then, she has never been employed as an extra again.

On the set of TV series *Ripper Street*

- d Work in pairs. Can you answer these questions from memory? Then quickly look back at the article to check.
- 1 What do extras often do while they're waiting?
 - 2 What did the extras have to do in the crowd scene in *Jersey Girl*?
 - 3 How do you know if the snow is real or not in winter scenes?
 - 4 What did an extra do during the filming of *Insurgent*, and what happened as a result?
 - 5 Why are a lot of movies made in Eastern Europe?
 - 6 Why are inflatable extras popular nowadays?
 - 7 What happens when extras watch TV?
- e Do you know anybody who's been an extra? What in? Why do you think some people enjoy being extras? Would you like to be one? Why (not)?

5 They are extremely _____.

Although extras aren't individually very well paid, a movie with a lot of extras needs a big production budget. The cost of extras is one of the reasons why epics such as *Ben-Hur* are largely a thing of the past. *Gandhi* was the last one – the funeral scene alone needed 300,000 extras. This is why now a lot of American movies are being shot in countries where extras are paid less, for example, in Eastern Europe.

6 Sometimes they are not _____.

Nowadays, where possible, crowds are digitized. In *Gladiator*, they used 2,000 live actors to create a digital crowd of about 35,000 people. For some of the crowd scenes, in addition to the real-life extras and the digital ones, they also used cut-outs made of cardboard. But digital extras can look fake, and cardboard extras can look very two-dimensional, particularly if the camera moves. The latest thing is inflatable extras, which look more real. They can be deflated, stored – a crowd of 10,000 can fit into one large truck – and reused.

7 They can't watch movies like _____ people.

Once you know how a movie has been filmed, it's hard to just watch it like any other person. "I can't watch TV anymore without looking at the extras to see who's doing it right and who's doing it wrong," said one extra.

D The wedding photo

Man, woman, dress, suit – you know, the usual.

What it says about you You want everyone to think that you are a grown-up. You don't go out and have a good time anymore. No, you are married! Also, you don't feel you exist as an individual anymore, and you don't have any friends of your own.

E The family photo

A photo of your children / baby.

What it says about you The main thing you have accomplished in your adult life is having children. You used to be fun and fabulous and have a lot of friends, but now all you talk about is diapers and children's TV.

F The popular culture reference

A picture of a cartoon character, a movie poster, a book cover, a musical act, a celebrity, etc.

What it says about you You have no personality of your own. Your identity depends on your entertainment choices – television, music, sci-fi, literary, or other. You own at least two T-shirts with stupid slogans on them.

G The party photo

You, often with other people, enjoying yourself at a party.

What it says about you You are young and stupid, and will be fired from at least one job for something you posted on Facebook. One day, you might regret this picture and replace it with a wedding picture, and then photos of your children.

H No photo at all

An icon, not a photo.

What it says about you You are technologically incompetent and don't know what a jpeg is; or you think you're too busy to find a photo; or you think not having a photo is "cool." Having no profile photo is annoying for everybody else. Get a photo.

- c Now read a positive interpretation of each type of profile photo and match it to A–H.
- You adore animals – in fact, in many ways, you prefer them to people.
 - You are a normal person and are happy with your appearance.
 - You're a dedicated parent and your children always come first.
 - You're a very private person. You prefer to talk to people face to face rather than use social media.
 - You're very up to date – you know everything about the latest movies, TV, and books.
 - Your friends and your social life are what matter most to you.
 - The day you got married was the happiest day of your life.
 - You had a wonderful childhood.

- d Talk to a partner.
- Is your profile photo type included? If yes, do you agree with any of the positive or negative interpretations of your profile photo(s)? If not, what is your interpretation of your photo?
 - Can you think of any friends or family members whose photos fit with the interpretations in the article?

A It be the Outer Banks – not in summer.

Can you learn how to be charismatic?

Colin Drury and Danish Sheikh

In the 21st century, *charisma* is the quality that people in all fields of life, from business to politics, would most like to have. But can you learn it? The man I have just met thinks so. His name is Danish Sheikh, and he is a charisma coach. He has worked with Microsoft, Yahoo, and the BBC, and he thinks he can turn anyone into George Clooney. He charges \$200 an hour, and plenty of people are paying. And for two days, I'm going to be his student.

Yesterday, he followed me everywhere and watched how I behaved with people – in stores, in the hair salon, and in work meetings. His impressions of me are not good – for example, I can't make conversation, I have negative body language, and I don't smile enough. I also seem bored when I'm talking to people.

"But don't worry!" Sheikh says, cheerfully. "We're going to fix all this."

- f Listen again. What does Colin say about...?
- 1 talking about yourself
 - 2 remembering a past success

CAN YOU understand this text?

- a Read the article once. What does the article say is the best exercise for all body types?

What is the best sport for your body type?

Just because someone has dreamed of playing soccer from childhood does not mean it is the best sport for him or her. Finding the sport your body is best suited to can make a big difference in how much you enjoy it and how good at it you are.

A person with an **ectomorph** body type is tall and slim with little fat or muscle. This person has narrow shoulders, chest, and hips, and thin arms and legs. Ectomorphs have difficulty putting on weight because of a fast metabolism. ¹ What suits ectomorphs is endurance sports. Marathon running, swimming, and soccer are excellent choices for them. ² , basketball may also be a great option. Ectomorphs also generally do well in gymnastics.

Mesomorph body types are the stereotypical image of an athlete. ³ . Mesomorphs can put on or lose weight easily and build muscle quickly. ⁴ . Possibilities range from weightlifting and boxing to sprint running and bike racing for shorter distances.

A person who is an **endomorph** naturally carries more body fat. ⁵ . They are often short, with a high waist, and well developed upper arms and thighs. While it may seem that an endomorph will not be very athletic, they can be very good at power sports because of their larger mass. ⁶ , but strength activities like wrestling, discus-throwing, or power-lifting can be a great fit.

A few extra considerations

It is important to note that the three body types are extremes. No one is 100% ectomorph or completely endomorph. ⁷ . Another key point is that diet and environment also contribute to athletic ability and genetics plays a large part. And the most important thing is to choose a sport you enjoy. The best exercise of all is the one that you will do!

- b Read the article again. Complete the article with A–G.

Eastern vs. Western – which education system is better?

According to the latest studies, Asian countries have better education systems than most Western countries, and in some subjects, Asian students are three years ahead of Western students of the same age.

In this unique experiment, five teachers from China come to a British school for four weeks to teach math, science, and Mandarin to half of the 9th-grade students, aged 13 and 14. The rest of the students in 9th grade will have their usual teachers. After four weeks, the two groups will take tests to see which teaching style gets better results.

So, can Western schools learn from the highly successful Chinese education system? Will the 12-hour days and strict discipline produce better results? Week 1 of the experiment is a shock for the students...

Is it really worth going to college?

Comments

1 It depends what you want to do. Some degrees are worth it, like engineering or medicine. But I think media studies, and things like that, are a waste of time.

2 College gives you the time and space to find out what you really want to do in life. And it has a lot of social benefits, like friends, clubs – that kind of stuff.

3 There are so many better alternatives out there, in my opinion. I thought about applying to college, but I went to a trade school instead. Now I'm doing an apprenticeship. I'm 22 and I'm earning money and learning on the job while my friends in college are in debt for thousands of dollars.

4 It still amazes me how everyone thinks that college is the only solution to their future. Trust me, it isn't. Some people are just not cut out for college.

5 I'm a software engineer at a global tech company. A degree is preferred, but not essential. The recruitment team always says if they have two people, and one is self-taught and has experience, and the other has just finished college with no experience, they'll choose the first. But often they ask for a degree AND experience.

7 SPEAKING

a In small groups, each choose a different topic from the list. Decide if you agree or disagree and write down at least three reasons.

School

- School doesn't prepare students for life. They should be taught practical things, like childcare, and how to cook healthy food.
- Physical education should be optional, and boys and girls should be taught PE separately.
- Elementary school students shouldn't get any homework, and high school students not more than one hour a night during the week.
- Schools should spend most of the time on math, science, and IT, and less on liberal arts subjects like history and literature.

College

- College classes are too expensive. They should be affordable for all students.
- Full-time college students shouldn't be allowed to have jobs during the school semesters.
- Students should choose to study a subject they love, not necessarily one that will get them a good job.
- College students should live independently, not with their parents.

1 READING & SPEAKING

a With a partner, look at the photos and answer the questions.

- 1 Where do you think these young people are living? Which do you think is the most comfortable place to live? Why?
- 2 Which place would you prefer to live in? Why?
- 3 Where do you live? How comfortable is it? Who do you live with? Do you get along well? Do you argue about anything? What?

b Look at the title of the article. With a partner, think of one advantage and one disadvantage of living with your parents when you're an adult.

c Read the article. Were your ideas in the list?

Things you know if you still live with your parents

In the US, 31% of young adults aged 18-34 still live at home with their parents. This has gone up by 5% in the last 40 years. So what are the pros and cons?

The downside

- It doesn't ¹ _____ how old you are, you'll always be a child to them. They'll tell you to put a coat on every time you leave the house.
- It's really ² _____ when you meet new people to admit you're still sleeping in your childhood bedroom.
- You have to ³ _____ them know all your movements and text them to say you're going to be home late.
- 99% of the time after a night out, your parents will be ⁴ _____, waiting for you – even if it's 4:00 a.m.

- Every day of your life, you ⁵ _____, "You treat this house like a hotel."
- You become the household IT technician. If anything goes ⁶ _____ in the house to do with phones, internet, or computers, you're called to the rescue.

But on the other hand...

- On weekends, you wake up to the smell of coffee and pancakes.
- The refrigerator and cupboards always have something in them, and generally a lot better than you could ⁷ _____.

- There's nothing better than home-cooked food, and you've ⁸ _____ that you'll never be able to cook as well as your parents.
- You've also realized that your mom has magical laundry powers that ⁹ _____ all the stains from your clothes and make them super clean.
- You have no idea how much ¹⁰ _____ cost. In fact, you didn't even know until recently that you had to pay for water!

So, despite how much you complain about still living with your parents, you know perfectly well that they've allowed you to save money, you have somewhere (nice) to live for far less than the cost of renting elsewhere, and they fill your stomachs with good food. And for that, you're eternally grateful.

a Read some comments posted in response to the article in 1. Do they want to leave their parents' home? Why (not)?

Vivienne@Montreal, Canada

I know there's a good side, but all I want is somewhere that's my own, where I can do what I want, where I can have my own furniture and pictures, where no one can tell me what to do. If I had the money, I'd move out immediately.

Mauro@Recife, Brazil

I'm perfectly happy living with my parents. If I lived on my own, I'd have to pay rent and do the housework and the cooking. Here, somebody else cooks and cleans, I have a nice room... Why would I want to leave? Even if I could afford it, I wouldn't move out. Not until I get married...

Andrea@Melbourne, Australia

It isn't that my parents aren't good to me – they are. If they weren't, I wouldn't live with them. But I'm 29 and I just don't feel independent.

Carlos@San Antonio, Texas

I'd love to move out. I get along well with my parents, but I think I'd get along with them even better if I didn't live at home. My mom drives me crazy – it isn't her fault, but she does. And I'd really like to have a dog, but my mom is allergic to them.

In the SHARK TANK

Shark Tank is a US TV series, with similar versions in many different countries, which has been on TV every year in the US since 2009. On the US show, contestants have about ten minutes to present their business ideas for a product or service to five very successful business people. These people are nicknamed "Sharks," and the intimidating room where they meet the contestants is the "Tank." The Sharks, who are often multi-millionaires, are prepared to invest money in any business that they believe might be a success. In return, they take a share of the profits. The contestants are usually young entrepreneurs, product designers, or people with a new idea for a service. After the contestants have made their pitch, the Sharks ask them questions about the product and its possible market, and then say if they are prepared to invest or not. If they are not convinced by the presentation, they say the dreaded words, "I'm out." So far, the Sharks have agreed to invest in more than 250 businesses.

Wallet Buckle

Trevor and Justin, from Northern California, designed the Wallet Buckle, a belt buckle that is also a wallet. It can conveniently hold up to four cards, e.g., a credit card, an ID card, a debit card, etc. The pair asked the Sharks to invest \$500,000 in their business.

Scrub Daddy

Aaron, from Philadelphia, asked the Sharks for \$200,000 in exchange for 20% of his sponge company, Scrub Daddy. The sponges, which cost \$3.99 each, are made from a special material that changes texture depending on the temperature of the water you're using. The sponge will get soft when used in warm water. In cold water, it gets firmer.

Proof Eyewear

Brooks, Tanner, and Tyler, brothers from Boise, set up a company to produce glasses made from wood and recycled materials that don't easily break. They brought each Shark a pair of personalized glasses and asked for a \$200,000 investment in exchange for 20% of their company.

When "happy to help" becomes a problem

Jonathan Haynes

It's my lunch break. I work near Union Station, a major Denver train station, and I've gone to the shopping mall there to buy a new wallet. It's a very simple shopping trip. At least, I think it's simple, but five minutes later, I'm not so sure.

As I enter the store, a salesperson at the far end shouts at me:

"Hi, how are you doing today? Do you need any help?"

I answer:

"I'm fine. I'm just looking, thanks."

That should be the end of the conversation, and I go to look at the wallets.

"Hello, do you need any help?"

Here is another salesperson, who I will call SP2.

Me: **"I'm fine, thanks. I'm just looking."**

I don't know why he needed to ask me this because I'm certain he heard me tell his colleague.

SP2: **"Are you going anywhere nice?"**

This seems like a strange question. I expected, "Are you looking for anything in particular today?" Because I don't answer, he repeats the question.

SP2: "Are you going anywhere nice?"

I remember that I'm in a store in a train station and I now understand his question.

Me: "No. I work near here. I just came in to look for a new wallet."

SP2: "Where do you work?"

Me: "Oh, uh, I work in an office around the corner."

I try to look at wallets, and hope he goes away.

SP2: "Do you like college football?"

It's a simple question, but I know that if I say yes, he will ask me questions about "your team." I'm not sure how this helps me to buy a wallet.

Me: "Uh, it's OK."

SP2: "Are you going to watch the Colorado game?"

I want him to stop.

Me: "No, I'm not."

I walk to another part of the store. The salesperson follows me.

SP2: "What are you doing after work?"

Me: "I'm having dinner with a friend."

SP2: "Are you doing anything for the rest of the day?"

Me: "Um, thank you for your help!"

I run away without a wallet. His never-ending questions lost him the sale. Shopping didn't use to be like this. It is a big improvement that salespeople nowadays acknowledge your existence and are sometimes actually helpful. But there's a difference between being helpful and trying to pretend you're a shopper's best friend.

Going the extra mile

In the age of social media, a story about a good (or bad) customer service experience is not limited to you and your friends. The best stories can go viral on social networks very quickly, bringing good or bad publicity to companies overnight. Here are five heartwarming true stories that reached millions of people because of the power of the internet.

A Nordstrom

One day, a member of the security staff in a Nordstrom department store noticed a woman crawling around on her hands and knees in the clothes department. She said she was looking for a diamond that had fallen out of her wedding ring while she was trying on clothes earlier that day. The man got down on the floor and searched with her. Then he asked a group of cleaners to help, and they searched, too. Finally, they looked through _____!

B Morton's, The Steakhouse

Peter Shankman was boarding a flight to Newark Airport, near New York City. It was dinnertime, and he knew he would be starving when the plane arrived. There's a Morton's near the airport, one of Peter's favorite restaurants, so he tweeted, "Hey, @Morton's – can you meet me at Newark Airport with a steak when I land in two hours? Thanks. ☺." He was joking, but amazingly, when he got off the plane, in the arrivals area there was _____.

C Ritz-Carlton Hotels

Chris Hurn's family spent their vacation at a Ritz-Carlton Hotel in Florida. Unfortunately, when they got home, they realized that they had left Chris's young son's favorite toy, Joshie the giraffe, at the hotel. The child was very upset, so Chris told him that Joshie was staying at the hotel for a little extra vacation. That evening, the hotel called to say that they had found Joshie. Chris thanked them and explained that he'd told his son that Joshie was having an extra vacation. Two days later, a package arrived. In it was Joshie, a present of a Frisbee and a ball, and a photograph of _____.

D Trader Joe's

At Christmas a few years ago, in Wayne, Pennsylvania, it snowed so hard that an 89-year-old man couldn't leave his home. His daughter was worried that he didn't have enough food. She called several stores and asked if they would deliver food to her father's home, but they all said no. Eventually, she spoke to someone at a store called Trader Joe's. They also told her that they didn't deliver – usually. But because she was so worried, they said that they would make an exception. The employee then wished her a Merry Christmas. Half an hour later, the food arrived at her father's house, with _____!

E Apple

A man bought the latest iPad online, but when his wife saw it, she thought it was too expensive, so he immediately sent it back to Apple. He put a sticky note on the screen that said, "Wife said no." Apple employees thought this was very funny, and the story reached two senior managers, who decided to do something about it. They refunded his money, but they also sent the iPad back to him with another sticky note saying, "_____."

IF YOU want to save money when shopping, 1 _____ the simple rule that you've probably shouted at the kids 100 times: don't touch anything! Touching anything, from a banana to a Ferrari, makes your brain automatically place more 2 _____ on an item.

This has been revealed in a study from Ohio and Illinois state universities, which investigated how much people were 3 _____ to pay for an item before and after touching it. The item was a cheap coffee mug, but just a few seconds of contact made people want to pay more for it than those who had looked but not touched.

The study, published in the journal *Judgment and Decision-Making*, tested 144 people and examined how much they were prepared to pay in an auction for the mug, 4 _____ how long they had held it. The 5 _____ people held the mug, the more they were prepared to pay, with those holding it for ten seconds valuing it at \$2.44 and those who held it for 30 seconds valuing it at \$3.91.

Some kinds of stores have been using these tactics for years; for example, car showrooms 6 _____ customers to test drive new cars and pet stores give people animals to hold. But Waleed Muhanna, the author of the study, was surprised at how quickly people felt that, once they had touched something, it was theirs. "People become attached and are prepared to pay more to avoid 7 _____ the object," he said. He hopes that understanding how quickly they can get attached to something may help 8 _____ to make better decisions about what to buy.

hitchhike verb travel by asking for free rides in other people's cars

ticket inspector noun a person who checks passengers' tickets on a train

The ticket inspector

I was living in a student flat in North London when the police knocked on my door one night. I thought it was because I hadn't paid the rent for a few months, so I didn't open the door. But then I wondered if it was something to do with my mother, who I knew wasn't very well. There was no phone in the flat, and this was before the days of mobile phones, so I ran down to the nearest phone box and phoned my dad in Leeds, in the north of England. He told me that my mum was very ill in hospital and that I should go home as soon as I could.

When I got to the station, I found that I'd missed the last train to Leeds. There was a train to Peterborough, from where some local trains went to Leeds, but I would miss the connection by about 20 minutes. I decided to get the Peterborough train - I was so desperate to get home that I thought maybe I could hitchhike from Peterborough.

"Tickets, please." I looked up and saw the ticket inspector. He could see from my eyes that I'd been crying. "Are you OK?" he asked. "Of course I'm OK," I said. "You look awful," he continued. "Is

there anything I can do?" "You could go away," I said rudely.

But he didn't. He sat down and said, "If there's a problem, I'm here to help." The only thing I could think of was to tell him my story. When I finished, I said, "So now you know. I'm a bit upset, and I don't feel like talking anymore, OK?" "OK," he said, finally getting up. "I'm sorry to hear that, son. I hope you make it home."

I continued to look out of the window at the dark countryside. Ten minutes later, the ticket inspector came back.

4 READING & SPEAKING

- a Do you consider yourself in general to be a lucky person? Why (not)?

Topic sentences

In a text, paragraphs usually begin with a *topic sentence*. This sentence tells you what the paragraph is going to be about.

- b You are going to read an article about luck. Read the information box about topic sentences, and sentences A–E. Then read the article and complete the paragraphs with A–E. Use the highlighted words and phrases to help you.

- A But is it possible to use these techniques to win the lottery?
- B A few years ago, I led a large research project about luck.
- C Eventually, we uncovered four key psychological principles.
- D In a second phase of the project, I wanted to discover whether it was possible to change people's luck.
- E The results revealed that luck is not a magical ability, or the result of random chance.

- c Read the article again. Choose a, b, or c.

- In his first research project into luck, the author asked the volunteers to _____.
 - record what happened to them every day
 - answer questions about their jobs
 - live together for a few months
- In one experiment, the unlucky people _____.
 - didn't count the photographs correctly
 - didn't notice something important in the newspaper
 - were not able to finish the task
- The researchers concluded that lucky people are generally _____.
 - optimistic
 - hard-working
 - ambitious
- In a second phase of the project, Wiseman asked his volunteers to _____.
 - change their jobs
 - change their attitude
 - change their lifestyle
- Wiseman believes that _____.
 - being lucky in your personal life is more important than being lucky at work
 - winning the lottery is as important as being lucky in your personal life
 - winning the lottery is less important than being lucky in your personal life

How to improve your **luck** and win the lottery **twice** (possibly)

Richard Wiseman

A North Carolina woman won the Diamond Dazzler lottery twice—in one day! She purchased a lottery ticket and to her surprise, won \$10,000. After she cashed in her ticket, she bought another ticket, which ended up being a \$1 million winner! She is clearly incredibly lucky - but is there anything we can all do to increase the chances of being lucky ourselves?

1 _____ I studied the lives of more than 400 people who considered themselves either very lucky or very unlucky. I asked everyone to keep diaries, complete personality tests, and take part in experiments.

2 _____ Nor are people born lucky or unlucky. Instead, lucky and unlucky people create much of their good and bad luck by the way they think and behave. For example, in one experiment, we asked our volunteers to look through a newspaper and count the number of photographs in it. However, we didn't tell them that we had placed two opportunities in the newspaper. The first was a half-page ad clearly stating, "STOP COUNTING. THERE ARE 43 PHOTOGRAPHS IN THIS NEWSPAPER." A second ad later on said, "TELL THE RESEARCHER YOU'VE SEEN THIS AND WIN \$150." The lucky people quickly spotted these opportunities, partly because they tended to be very relaxed. In contrast, the unlucky people focused anxiously on the task of counting the photos and so tended not to see the advertisements. Without realizing it, both groups had created their own good and bad luck.

3

- Lucky people create and notice opportunities by developing a relaxed attitude to life and being open to change.
- Lucky people tend to listen to their intuition and act quickly. Unlucky people tend to analyze situations too much, and are afraid to act.
- Lucky people are confident that the future will be positive, and this motivates them to try, even when they have little chance of success. Unlucky people are sure that they will fail, and so they often give up before they have begun.
- Lucky people keep going, even when they are likely to fail, and they learn from their mistakes. Unlucky people get depressed by the smallest problem, and think that the problems are their fault, even when they aren't.

4 _____ I asked a group of 200 volunteers to use the four key principles and to think and behave like a lucky person. The results were remarkable. In a few months, about two-thirds of the group became happier, healthier, and more successful in their careers.

5 _____ Unfortunately not. Lotteries are purely chance events, and nothing can really influence your chances of success. However, the good news is that being lucky in your personal life and career is far more important than winning the lottery.

 - 2 Can you remember a time when you were either very lucky or very unlucky? What happened?
 - 3 Do you know anyone who you think is particularly lucky or unlucky? Why?
 - 4 Think of a time when you were successful at something. Do you think it was because you worked hard at it, or because you were lucky and in the right place at the right time?

Q Indirect questions

We often put *Can / Could you tell me...?, Do you know...?, I'd like to know..., I wonder...* before a question to make it less direct and more polite. When we do this, the direct question changes to an affirmative sentence, i.e., the word order is (question word / *if / whether*) + subject + verb and we don't use *do / did* in the present and the past.

Compare:

Why is Paul in your apartment?

Could you tell me why Paul is still in your apartment?

Has he got one now?

Do you know if (or whether) he's got one now?

What do you really want?

I'd like to know what you really want.

Do you really want to be here?

I wonder if (or whether) you really want to be here.

What did you decide at the last meeting?

Can you tell me what you decided at the last meeting?

May and June By

Part 1

Mr. and Mrs. Thrace named their daughters May and June because of the months when they were born.

May was the oldest. She was changeable like the month, sometimes warm, sometimes cold, and neither pretty nor smart.

05 June, however, was both, and her sunny personality brought her many admirers. When May was twenty, she met a young lawyer named Walter. He was extremely good-looking and his father was wealthy. May fell passionately in love with him. He asked her to marry him and of course she accepted. During that time, 10 May almost became beautiful, but the intensity of her passion frightened Mrs. Thrace.

June was away from home studying to be a teacher when May and Walter got engaged, so Walter had never met her. But a month before the wedding, June came home for summer 15 vacation. It was all very unfortunate, Mrs. Thrace said, over and over again. If Walter had left May for some unknown girl, they would have been furious. But what could they say or do when he had fallen in love with their younger daughter?

May became violent and tried to attack June with a knife. 20 "We're all terribly sorry for you, darling," said Mrs. Thrace. "I will never marry now," said May. "She's ruined my life. She stole my husband." "He wasn't your husband, May," her mother replied.

When June and Walter came to visit, May always went out, 25 but she knew about them because she always read June's letters to her mother. She knew that they had a big house, that they collected furniture and pictures, and that they didn't have any children. She knew where they went for their vacations and who their friends were. But she could never discover if Walter loved 30 June or not. She thought that perhaps he was sorry that he had married June and not her. This thought was the only thing that comforted her.

Ruth Rendell

Part 2

May never married and she continued to live at home for over 30 years, until her parents died. Mrs. Thrace died in March and her husband, six months later. At her father's funeral, May saw Walter and June again. Walter was still good-looking and May wanted to die when she saw him. "Please come and speak to your sister," he said to her. But May refused.

It was only at another funeral that they were reconciled. May learned of Walter's death from the newspaper and the pain was as great as when her mother had told her that Walter wanted to marry June. Inside the church, her sister came up to May and asked her to forget about the past. "Now you know what it's like to lose him," May said.

Two days later May got a letter from June. June asked her to come and live with her, now that they were both alone. "Now that you've retired and don't have very much money, I'd like to share my beautiful house with you," she wrote. "Perhaps this way I can give you something in return for what I took away from you."

May decided to accept. She thought it was right. During their first evening together, she asked June to talk about her marriage, about her life with Walter. But June didn't want to talk. May looked in the house for letters or presents from Walter, jewelry, or pictures. She couldn't find anything. Even June's wedding ring wasn't as beautiful as the engagement ring Walter had given May all those years ago. "He never really loved her," she thought. "All these years, he loved me." She decided to start wearing her engagement ring again – on her little finger, which was the only one it now fitted.

g Listen again. Answer the questions.

The SAN FRANCISCO DUNGEON

1 _____ IS
THE SAN FRANCISCO DUNGEON?

The San Francisco Dungeon brings together amazing actors, special effects, stage performances, scenes, and rides in a truly unique and exciting experience that you see, hear, touch, smell, and feel. It's dark, atmospheric, hilarious, and sometimes a little scary.

2 _____ **DOES IT WORK?**

We've been entertaining and scaring audiences at The San Francisco Dungeon for over 5 years and it's one of the Bay Area's "must-see" attractions. We take you on a 60-minute journey through 170 years of San Francisco's unpleasant past. You and your companions walk through the Dungeon, moving from show to show, guided by our professional actors.

The shows are based on real San Francisco history and legends, without the boring parts! You'll get up close and personal with scary characters including Sam Roberts, a gang leader during the 1840s Gold Rush, the infamous bar owner, Miss Piggot, and Shanghai Kelly, her partner in crime.

It's a theatrical experience. That means authentic sets and theatrical storytelling. On your journey, you'll pass through narrow San Francisco streets and houses and the horrific torture chamber. Believe us, it's better than a sightseeing trip or boring museum tour of San Francisco!

3 _____ **'S IT FOR?**

The San Francisco Dungeon is scary fun for everyone except very young guests and very sensitive adults! Our recommended age is 10 years old and above, and guests who are under 13 years of age must be accompanied by an adult over 18 years of age.

4 _____ **AHEAD!**

The San Francisco Dungeon is very good for people who can plan ahead and book online! Not only will you save money, you won't have to wait on the day. We get busy, so make things easy on yourself and book in advance!

7A COLLEGE OR NOT?

Student A

a Read about Darius.

Darius Hill, 23, studied economics in college.

When I was in college, I was a student athlete. I worked out with my team early in the morning. I went to class during the day. And then I had basketball practice or played in a game at night. I was always busy, but I loved it.

After graduating, I moved back home with my parents because I wasn't able to find a full-time job. They've been really cool about me coming back home. They know the job market is tight, and that finding a job that pays well and has good benefits is really hard. I've applied for at least 50 full-time jobs and most of them never even got back to me.

Now I have three part-time jobs that have nothing to do with what I studied in college. I work 15 hours a week at a local donut shop, I walk dogs three times a week for my neighbors, and I'm an assistant basketball coach at my old high school. I make enough money to pay for my car insurance and to give my parents a little rent money. Sometimes I ask myself the question, "Why did I study economics?" But I'm still applying for full-time jobs and I'm still optimistic.

8A MATCH YOUR PERSONALITY TO THE JOB

Students A+B

In which group(s) do you have most check marks (✓)? Read the appropriate paragraph to find out which jobs would suit you. Would you like to do any of them?

If you have the most check marks in 1–4, the best job for you would be in the "caring professions." If you are good at science, you could consider a career in medicine, for example, becoming a doctor or nurse. Alternatively, teaching or social work are areas that would suit your personality.

If you have the most check marks in 5–8, you should consider a job involving numbers, for example, becoming an accountant, or working in the stock market. The world of business would also probably appeal to you, especially sales or marketing.

If you have the most check marks in 9–12, you need a creative job. Depending on your specific talents, you might enjoy a job in the world of music, art, or literature. Areas that would suit you include publishing, journalism, graphic design, fashion, or the music industry.

If you have the most check marks in 13–16, you have an analytical mind. You would suit a job in computer science or engineering. You also have good spatial sense, which would make architecture and related jobs another possibility.

"I'd love to come to dinner with you." And that's how it all started. 7A COLLEGE OR NOT? Student B

- a Read about Emily-Fleur.

Emily-Fleur Sizmur, 19, runs her own photography business.

I graduated from school at 17. I've never been very interested in school or academic achievement. I still don't know my final grades – I got them in the mail a few weeks after graduation, but I've never opened the envelope!

When I left school, I was ready to start a business. Three of my sisters were getting married and I saw an opening in the market for wedding photographers in our area. I'd always loved taking photos and I saw an opportunity to make money doing something I liked. One of my science teachers was getting married and I asked her if I could take some pictures. She agreed and I posted my photos on Facebook the following day. Within a week, I had bookings for two more weddings. When I'd done six weddings, I spent \$3,500 on better equipment.

I don't think my age was a disadvantage. In fact, I think starting out young has been a huge help. People are more prepared to give someone young a chance. If I was 30 and starting out in this business with no experience, I think it would be much more difficult. A lot of my friends are going to college, but I don't envy them. They'll have to get out into the real world one day and I'm already here.

The Sharks wanted larger shares of the company than the brothers were comfortable with. The night after the episode aired in 2012, the website crashed with more than 1.2 million visits because people wanted to buy their glasses. Since then, the brothers have made a lot of money, for example \$2.5 million in 2014 alone. And because they own the company entirely by themselves, they are the only ones enjoying the profits.

- 1 Why has Angela written to Sofia?
- 2 Does Sofia recommend her friend to Angela?

Inbox

From: Angela Vernon
To: Sofia Lugo

Hi Sofia,

I hope you're well. I'm looking for an au pair to look after Austin and Melissa, and I remembered your Peruvian friend Marisol, who I met last summer. She said she might be interested in working in the US as an au pair, so I thought I would write and ask her. The thing is, I don't really know her, so before I write and suggest it, could you tell me a little about her (age, personality, etc., and what she likes doing), so that I can see if she would fit in with the family? Please be honest!

Angela

From: Sofia Lugo
To: Angela Vernon

Hi Angela,

Marisol is one of my best friends, so of course I know her very well. She's 22, and she just graduated from college with a degree in economics, but she doesn't have a job yet, and I'm sure she would be interested in going to the US. Her parents are both doctors, and she has two younger brothers. She gets along very well with all of them, and they are a very close family.

Marisol's an intelligent woman and very hardworking. She's good with children – she often takes care of her brothers, so she has a lot of experience – and she's also very mature and responsible. She can be really shy at first, but when she gets to know you she's incredibly friendly. The only problem with Marisol is that she's a little forgetful... she sometimes loses things, like her keys, or her phone. Also, to be honest, her English isn't fantastic, but I'm sure she'll improve very quickly.

In her free time, she likes going to the movies, listening to music, and she's also very good at photography – she always has her camera with her. She's really independant and happy to do things on her own, so you won't have to worry about taking her to places.

I think Austin and Melissa will love her. Let me know if you need to know anything else. I hope this helps!

Love,
Sofia

9 AN ARTICLE – ADVANTAGES AND DISADVANTAGES

Wikipedia, for and against

Wikipedia is ¹a online encyclopedia. It has become the main information source for ²millions of people every day. It is a wonderful resource, but it has both advantages and disadvantages.

The first advantage of Wikipedia is that it has information about more or less everything, and the information is easy to find. Second, Wikipedia ³usually gives a good basic introduction to a topic. Third, it gives links and references to other sources, so it's easy to find out more if you want to.

⁴In the other hand, there ⁵is also disadvantages. For example, the information on Wikipedia is sometimes inaccurate, which is a problem if ⁶its your only information source. Also, you don't know who has ⁷written the articles. It may be an expert, but it may be an amateur, and sometimes there is a personal or political bias.

⁸To conclusion, if ⁹your looking for information, Wikipedia is an excellent place to start. But it shouldn't be your only source – it's important ¹⁰get your information from other places too.

- d Now decide which are the three biggest advantages and number them 1–3 (1 = the biggest). Do the same with the disadvantages.

Writing about advantages and disadvantages

Listing advantages:
First / Firstly,... Second,... Third,...

Listing disadvantages:
On the other hand, there are also (some) disadvantages...
For instance, / For example,...
Also,...

Conclusion:
In conclusion, / To sum up, I think...

- e **Write** an article called "Smartphones – essential for modern life?" Start the article with this introduction.

Most people today have a smartphone. But are they really essential for modern life? I think there are both advantages and disadvantages.

Write three more paragraphs. **Plan** what you're going to write using the paragraph notes below. Use the language in the **Writing about advantages and disadvantages** box to help you.

Paragraph 2	two or three advantages
Paragraph 3	two or three disadvantages
Paragraph 4	conclusion – say if you think smartphones are essential for modern life or not

- a Read the article about the advantages and disadvantages of Wikipedia. Then cover it and answer the questions from memory.
- 1 What are the three advantages of Wikipedia?
 - 2 What are the two disadvantages?
 - 3 In general, is the writer for or against Wikipedia?
- b Read the article again. There are ten mistakes (grammar, vocabulary, punctuation, and spelling). Can you correct them?
- c You are going to write a similar article about smartphones. Make a list of the advantages and disadvantages.

Advantages	Disadvantages

Part 1

Interviewer With me today I have Marianna Leivaditaki, head chef of Morito restaurant in London...Marianna, what was your favorite food when you were a child?

Marianna Um, well at home, we ate a funny mixture, because of my parents. Um, fresh fish, bacon and eggs for breakfast on Sundays, and traditional apple pies. But my favorite was fish. We ate fish every day, which my dad caught. In fact, my dad still goes fishing every night!

Interviewer Wow!

Marianna Yeah, we were really lucky because not all families could do that – could eat fish every day. Even on an island fish is expensive, unfortunately.

Interviewer Did your dad catch fish for the family or for the restaurant?

Marianna For both. Um, except for lobsters. When he caught a lobster, he never sold it. It was always for us. We boiled it and ate it with lemon and olive oil. You don't need anything except lemon and olive oil when fish and seafood is really fresh. That's how I cook lobsters nowadays in the restaurant, in Morito.

Interviewer Were you interested in cooking when you were a child?

Marianna Oh yes. I spent every evening in our restaurant, and instead of playing with the other children, I usually helped in the kitchen. I wrote down recipes which I wanted to cook for the family, in a small blue notebook.

Interviewer So your love of food and cooking came from your parents?

Marianna From my parents, and also from my aunt, and from many inspiring ladies who surrounded me when I was growing up. My aunt, Thia Koula, had animals, a garden, olive trees, and grapes. In the summer, I often spent all day with her. She knew everything about wild food in Crete. She only ate what she had grown or found or made herself. Such a beautiful way to eat.

Interviewer Did you ever eat out as a child?

Marianna Never in the evening, um, because our restaurant was open for dinner seven days a week, but occasionally my mum used to buy me and my brother *souvlaki* for lunch, a sort of Greek sandwich with pita bread. Inside it has pork, tomato, red onion, and lots of thick yogurt.

1.9

Part 2

Interviewer So did you always want to be a chef, to have your own restaurant?

Marianna No, not at all. I wanted to be a psychologist, and when I was 18 I came to the UK to study at Kent University. Then I decided I didn't want to be a psychologist after all and I went traveling for a bit – I'd saved some money at university because I worked in the evenings. I went all around southern Europe and also to South America, to Ecuador. I tried all sorts of different dishes and fell in love with food again, so I went back to Crete and worked in our family restaurant for two years.

Interviewer Why did you come back to the UK?

Marianna Well, I wanted to continue working as a chef, but I needed a bigger challenge. And when I was a student in the UK and I missed good food, I used to save money to go to London to have dinner in a restaurant called Moro. It wasn't Greek food, but it was Mediterranean, Spanish,

North African, and I loved it. So when I came back to London I went to Moro and I said, "I want a job" – and they gave me one.

Interviewer And what happened then?

Marianna Well, really slowly, through hard work, and after seven years, I became head chef. It was magic. And then the owners of Moro, Samantha and Samuel Clark, suggested that I help them open Morito.

Interviewer How is Morito different from Moro?

Marianna It's the same inspiration, and, um, many of the dishes are similar, but because I run the kitchen I have been able to have more Cretan dishes on the menu, dishes from my childhood. This week, for example, I'm making *ntakos*, a Cretan salad made with fresh goat's cheese, tomato and bread.

Interviewer Do you go back to Crete much?

Marianna Yes, I go to Crete maybe four or five times a year. My family's restaurant is closed now, but I go out for lunch with my friends, the people I miss when I'm in London. Food comes, and we share everything. We always order too much, and by the end of it we feel incredibly full.

Interviewer Well, Marianna it's been great talking with you, and thanks for coming in.

Marianna Thank you very much for having me.

1 **A** So what are you going to do next year, Adam? Are you going to go to college? Adam? Can you hear me?

B Sorry, Grandma. What did you say?

A I said, are you going to go to college next year?

B No, Grandma. I've already told you like 100 times. I'm not going to go to college. I'm going to look for a job. I need to earn some money.

A All right, dear. You don't need to shout. I can hear perfectly well, thank you. What time is it?

B Ten to three. I'll get you some coffee.

A Oh, thank you. That'd be nice.

2 **A** Bye. See you tomorrow.

B Bye. Hey, what do you mean tomorrow? Aren't you coming back tonight?

A No, I told you about it yesterday. I'm going to a party at Katie's. I'm staying overnight there.

B Who else is going?

A Oh, just the usual crowd. You don't know any of them.

B Well, make sure you don't go to bed too late. And don't forget to...

A Bye.

B Where's your coat? You can't go out like that. It's going to be cold tonight!

A Bye!

3 **A** Can I use your car tonight?

B No, you can't.

A You said you didn't need it. Why can't I borrow it?

B Because you won't take care of it. You'll drive too fast.

A I won't, I promise, I'll drive really slowly. I'll be really careful.

B Oh, all right.

A Thanks. See you.

Dan Well, I can remember one terrible thing I did to my brother when we were teenagers – I have a twin brother. Um, so we used to fight and argue a lot, as, as kids and teenagers. And one time, when we were about 15, we were

fighting, arguing, we shared a bedroom, so we were in our room, um, fighting each other, and I accidentally stabbed him in the hand with a pen that I was holding in my hand. And it was, it was a total accident, and I was holding it and I was kind of threatening him, but I didn't really mean to, to stab him, obviously, um, but I did, and I was absolutely horrified at what I'd done. And of course, he, my brother, he looked down at his hand, with this blood coming out from where I'd stabbed him, and he looked up at me, and he said, "I'm going to tell Mom!" Which sort of made me laugh because you know, we were both 15 at the time, and it was a very childish thing to say. And he ran downstairs to tell our mom, and I was absolutely terrified that she was going to be really angry with me. Which she was, of course. But, um, he was fine, by the way, it was a very small wound. He didn't have to go to the hospital or anything, it was absolutely fine, but, um, he still, now this is, you know, we're in our late forties now, so this is 30 years ago, but he still sometimes tells people, when we meet them, about when I stabbed him. But yeah, it wasn't a very nice thing to do to him!

Marilyn Well, my sister was four years older than me. She still is, actually. Um, I remember once when I was about ten years old, I had a pet, a bird. Um, it was a small green parrot named Charlie, and I really loved him. He lived in a cage but I sometimes let him out to fly around the house, you know so, so he could have some freedom. And one day, I was in my bedroom and I let him out, but then something happened – I can't remember what and I forgot about him for a, for a while, and then suddenly I couldn't see him anymore. And, well, I looked everywhere for him, I looked all over the house and I couldn't find him anywhere. Oh I cried and I cried because I was sure that he had flown out of the window. And my parents started to help me because they felt awful about it as well. And just when I was completely hysterical my sister admitted that, in reality, she had hidden him. She had shut him inside a cupboard. Can you believe that? Well, she opened the cupboard and poor Charlie was there, he was so frightened, but we were all really relieved to find him. My sister was so horrible that day. Of course, now we get along really well, but I still remember what she did to poor Charlie and sometimes when she comes to see me I hide her car keys or her purse or something just to remind her of it. Is that bad?

Host Hello, and welcome to *Five-Minute Money*.

Today we're talking about scams and scammers. Millions of people a year are victims of scams in the US. In 2017, Americans lost \$905 million because of scams, so we all need to know what to look out for. We're going to hear three listeners' stories, and for each scam we'll explain how to stay safe.

Our first story is from Tara in Knoxville.

Tara A few months ago, I got an email from my cousin who was studying abroad in South Africa. He said he'd lost his backpack with his ID and credit cards and needed money to get home. He asked for my credit card number, and I was like, well, it's my cousin, I have to help him! So, I sent him a reply with my credit card number and everything. But there was no reply. So, I got suspicious, and I checked my credit card balance, and somebody had stolen over \$3,000. Of course, I never got it back.

Host Ah, the friend (or family member) abroad who needs help. But it isn't really a friend, it's a scammer who is using this friend's email account. Often this scam is obvious, either because you know your friend isn't abroad, or because the email has grammar and spelling mistakes. So always be suspicious of any strange emails from friends.

The next story is from Max in Madison.

Max I got an email saying that I'd won a lot of money in the Mega Millions lottery. It looked official, and it was from "The Mega Millions Corporation," so I thought it was real. I did buy a Mega Millions lottery ticket last fall when the jackpot was close to \$1 billion dollars, so I believed it. I emailed back and they replied and said the easiest thing was for me to send them my bank details, and they'd pay the money directly into my account. So, like an idiot, I did, and the next day my bank account was completely empty. Thank goodness my account only had three hundred dollars in it. I feel so stupid, but I definitely learned my lesson.

Host Yes, so again, never believe an email or message saying you've won a lottery, especially if you've never bought a ticket.

Our last story is from Zeke in Hartford.

Zeke It was a Saturday morning and I'd just gotten back from the gym. The phone rang and a woman said she was from Citibank's security division. She said the bank was conducting its regular account verification process and that I needed to verify my credit card number and some other information. I thought it was weird that the bank was calling on a Saturday morning, but she was so nice and polite, so I gave her all my credit card information. A few days later, I tried to use my credit card and it was declined. I called the Citibank customer hotline and the bank representative said that my credit card was deactivated because of suspicious charges. The representative told me that Citibank never calls its customers to verify credit card information. Thank goodness I wasn't responsible for any of the suspicious charges, so I didn't lose any money.

Host It's natural to co-operate if you think your bank is calling you, but your bank will never ask you on the phone to verify your account details. If you get suspicious, just hang up, wait ten minutes, and then call your bank to check if it really was them.

So, what's the most important thing to remember if you don't want to be the victim of a scam? Be very suspicious of strange emails from friends or from someone saying that you've won a prize, and the same for phone calls from your bank. And above all, never, never give your bank account or credit card numbers to anybody, either in an email or on the phone, unless you are 100% sure who they really are.

Part 1

Interviewer The charity Adelante Africa was started in 2008. That summer a group of Spanish and British tourists had traveled to Uganda on safari to see the mountain gorillas. Halfway through the trip, in a small rural village called Igayaza, the truck they were traveling in broke down. While a mechanic repaired the truck, the group took shelter in a nearby building. It was a school for orphans, children without parents, but it was in terrible shape. The walls were falling down, the blackboards were broken, and there weren't many desks. But the children were wonderful, very bright and friendly. One of the tourists was a school teacher, and she started teaching them English songs. She was amazed at how quickly they learned. When they left, they asked the principal how they could help, and he said, "What we need is a new school." When the tourists arrived home from their vacation, they decided to set up a charity to raise money to rebuild the school. Two years later, on

March 14th, 2010, the new school opened with 75 children – and since then Adelante Africa hasn't stopped.

2.14

Part 2

Interviewer I'm with Jane Cadwallader, the secretary of Adelante Africa.

Jane Hello.

Interviewer Hi Jane, how long have you been working with Adelante Africa?

Jane Well, for over ten years now. Since the beginning. I was the teacher who sang songs with the children back in 2008 when the lorry broke down.

Interviewer Jane, tell us what Adelante Africa has been doing since 2010, since the school was finished.

Jane Well, we've done a lot. Our next major project was to build a children's home for the orphans who don't have anybody in their extended family who can look after them. The children's home has been running since 2012 and now we have 57 children there. But we also realized that if we wanted to help the local children, we really needed to help their parents, too. Our primary school was beautiful but many of the children were sick. They had malaria or malnutrition. So we started several small community projects. For example, we tried to help people to improve their diet by giving them seeds to plant a variety of vegetables. Most people in rural Uganda, you see, um, don't eat fruit and vegetables, except what they can find growing wild. We've also been building water tanks to collect rainwater so that they have cleaner water to drink, and they don't have to walk the long distances to the nearest river. And we've started a small factory to make sunflower oil, which has helped local farmers, and also given some jobs to local people. Sunflower oil is much healthier than the palm oil that most people were using before, so really we've helped the whole community with this.

Interviewer And are all of your new projects related to education?

Jane Absolutely. In 2011 we started a FAL group in Igayaza – FAL stands for Functional Adult Literacy, so these are classes to teach adults – mainly women – to read and write, and to speak English, which is the official language in Uganda. Since then we've started 11 more FAL groups in other nearby villages. And our other big project is that we've just built a secondary school, so that children from our primary school and the other local children can get a good secondary education. We're very proud of it – it's not quite finished yet, though. We need to raise more money in order to finish all the buildings.

Interviewer And are all the volunteers, the people who work with you, from Britain and Spain?

Jane No, not at all. There are a few of us from Europe who visit regularly, but the people who make it all possible are the Ugandan volunteers. Without them we couldn't do anything! In the future, we hope that all the projects will be run by them.

Interviewer And can you tell me about some of the children, some individual cases?

Jane Hmm, let me think. I know a good example. John Muzzei. He's a boy, an orphan, who was at the primary school when the lorry broke down. He was very bright, and when he finished primary in the new school, he got very good grades and we sponsored him to go to secondary school. He worked very hard there as well and did very well, and now he's in the last year of nursing at a good nursing college. And I also have to tell you about Baby Rose. She was brought to our children's home with her brother. They were living alone in a hut with their mother, who was dying of AIDS. When they arrived, Rose was a year old. She was suffering from malnutrition and weighed only five kilos. Her little legs were so thin that we thought she'd never walk. And she never ever smiled. Now, one year later, she's running around

laughing and smiling. Since she came here, she's changed completely into a healthy, happy child.

Interviewer So Adelante Africa has really changed their lives?

Jane Yes, it's changed their lives, but it's also changed the lives of the people who work for Adelante Africa. Most of us feel it's the most satisfying thing we've ever done. Have a look at the photos and videos on our website – it's www.adelanteafrica.org. Maybe it will change your life too.

Host Hello and welcome. On today's show we're talking about how to drive safely. A new book called *Survive the Drive* has just been published, and we asked Tom, our transportation and travel correspondent, to take a look. Welcome, Tom.

Tom Thank you.

Host So, tell us – what's the most dangerous thing you can do while you're driving? Obviously, we're not talking about drinking alcohol, taking drugs, or using a handheld phone to make calls or text, which everyone knows you must never do.

Tom Well, this is really surprising, at the top of the list is driving when you're feeling emotional. The researchers found that you're nearly ten times more likely to have an accident if you're feeling very sad or angry or stressed. If you're emotional then you can't concentrate on the road, and you'll probably make bad decisions if you find yourself in a dangerous situation. In fact, if you're feeling very emotional it'd be better not to drive at all!

Host Wow, OK. I'll try to remember that next time I have a bad day at work! What's the second most dangerous thing?

Tom This one's less surprising – it's reaching for something in your car. It might be your phone, or a map, or some candy. If you're reaching down, or trying to get something from the back seat, then you aren't looking at the road, and you're nine times more likely to have an accident.

Host And number three?

Tom Number three is looking at something interesting or something that's happening by the road. A really common example of this is when people slow down to look at an accident – they don't realise that by looking at the accident and not at the road, the chance of having an accident themselves goes up over seven times. In fact this is a really common cause of accidents on freeways.

Host So the message is, don't be distracted.

Tom Yes, exactly. If you're driving fast, you can travel over 300 feet in less than three seconds. And a lot can happen in three seconds.

Host So that's the top three – what about other things to avoid?

Tom Well, at number four is adjusting your GPS, which can be very distracting, and makes you nearly five times more likely to have an accident. At number five is driving when you're tired. 60% of drivers say they've driven when tired in the last year, so it's a big problem – and you can lose control of your car completely. At number six is adjusting your radio or music system. This makes you twice as likely to have an accident. Again, it's the distraction from the road that's the problem, and only having one hand on the wheel.

Host And the last two?

Tom The seventh is eating or drinking, because again, you usually take one hand off the wheel, and the eighth is talking to a passenger, which can be distracting because the driver often turns to look at the passenger.

Host So how would you summarize the research? What did you find most interesting?

Tom I think for me the most interesting thing is that some of these things don't seem very dangerous and good drivers often do them – but the research shows that they are. So next time you get in your car to drive somewhere, think about what you're doing, and always, always keep your eyes on the road!

Host "Pink is for girls, blue is for boys." How many times have we heard that? And if you walk down the aisles of children's clothes stores you'll see rows and rows of clothes in these two colors. But where does this rule come from exactly? Are little girls genetically attracted to pink, and little boys to blue?

It seems not. You may be surprised to hear that 100 years ago, it was the exact opposite. In a popular magazine of the time, an article said "The generally accepted rule is pink for boys and blue for girls. The reason is that pink, being a stronger color, is more suitable for a boy, while blue, which is more delicate, is prettier for a girl." The change to pink for girls and blue for boys happened only after World War II. The idea of women being equal to men emerged and, as a result, people started dressing little girls in pink. Soon advertisers got a hold of the idea, and made blue the color for boys. Since then the pink and blue stereotype has never gone away. And it is not only clothes, but all sorts of other things as well. Girls' rooms and furniture are painted pink, girls' accessories are made in pink, girls' toys are packaged in pink. South Korean photographer JeongMee Yoon was so struck by this that she created a series of photographs called *The Pink and Blue Project*, where children were photographed in their rooms with all the things they possessed, in either pink or blue. But is this something we really need to worry about? Alison Carr, from the Institute of Engineering and Technology, says yes.

Alison When we're choosing between one toy or another to buy as a present for a child, we're influenced by stereotypes, and if the child is a girl, we'll probably choose something pink. And this is a problem, because not only are 89% of girls' toys pink, but also only a very few of them are connected with science or math. Most girls' toys are still based on dolls and dressing up, while boys' toys are more likely to be related to building and cars. And the problem is that the toys we play with influence our interests, and even the jobs that we end up getting. If girls don't have access to as many construction toys, or mechanical and scientific toys as boys, they'll think that science and technology is "not for them" so they'll be less likely to choose to study it at school and later in college. I think that if they were allowed to choose for themselves, girls and boys would choose the same sort of toys, and that parents need to forget about the stereotypes, about pink and blue. Toys should be the same colors for all children, red, yellow, green, whatever.

Host However Natasha Crookes, from the British Toy & Hobby Association, doesn't agree.

Natasha I think that instead of abandoning the pink and blue thing we should use it. If we want girls to get interested in maths and science, we should package science and engineering toys in a pink box. Then maybe girls – or their parents – will start buying them.

Host Thank you, Natasha, And now we're moving on to...

Host Good afternoon, everyone. On today's *Modern Manners* show, the subject is family, and what to do with rude relatives. Our etiquette expert Sarah is here to take your calls, so if you have a family member who behaves badly and you don't know what to do about it, just call us here at 1-800-555-4545.

And our first caller is Belinda from Walnut Creek. Hi Belinda, tell us about your rude relatives.

Belinda Well, I hate to say it because it's such a cliché, but it's my mother-in-law. She's a nice woman, don't get me wrong, and on the whole, we get along well, but one thing she does that I think is really rude is that whenever she comes

over for a meal she criticizes my cooking. I'm not a professional, obviously, but I think I'm a pretty good cook, and it really annoys me, especially after I've spent hours making something really good.

Host OK, so Sarah, over to you. How should Belinda deal with her mother-in-law?

Sarah Hi, Belinda. I know this won't be easy, but when she does this, I think you should be the one who behaves well. Stay calm, thank her as politely as possible for her advice, and change the subject. You shouldn't argue with her, because she won't change her opinion – and it won't make you feel better either. Instead, encourage your husband or another relative to say how great your cooking is in front of your mother-in-law. When she sees that her criticisms aren't having any effect, and that everybody else loves your food, she'll either stop criticizing or she'll start paying compliments herself.

Host Thanks very much, Sarah. Great advice! And our next caller is Damien from Hudson. Hi, Damien. I think you're going to tell us about a problem with your brother, is that right?

Damien Yes, that's right.

Host So, what's the issue?

Damien Well, he lives in New York City and he likes to come and stay with us from time to time, which is great. But he just called me saying he's coming next month and he's bringing his new dog. I know he just got this dog, and he takes really good care of it, and doesn't like leaving it alone, but it's still a puppy and my girlfriend and I aren't very into dogs. Also, we just redecorated our house, and we did a lot of work on the yard, and I'm pretty sure the dog's going to destroy them both.

Host Sarah, what do you think Damien should do with his brother and his dog? Do you think it's rude to arrive at someone's house with a dog?

Sarah Yes, I have to say I do. It's bad manners for a guest to bring an uninvited pet, even to a relative's home. This is true even if you have one of your own and your house is already animal friendly. I think you should politely but directly say how you feel. You can add a reason like, as you say, you just redecorated, but to be honest, you don't really have to give a reason.

Host Well, that's very clear advice, thanks Sarah. And finally, Miranda from San Pedro. Hi, Miranda. Tell us about your problem.

Miranda Hi there. My problem's with my nephew, my sister's son. He's eight years old and his parents don't set any rules for him. So, he's really wild, and whenever they come to our house, he just shouts all the time, jumps on the furniture, makes a mess in the kitchen. He even writes on the walls! It's really exhausting, but my sister's very sensitive about me criticizing her son, so generally I don't say anything. But I've reached the point where I'd almost prefer it if they didn't come over.

Host Sarah, what should Miranda do with her nightmare nephew?

Sarah You have to speak to his parents before their next visit, or at least to your sister. But instead of being critical, say how great it is that their son has so much energy, and how much you love him, but then explain that he has to calm down a little when he's visiting. And at the beginning of his next visit, welcome him, but give him some rules for your house. Say, "Hi, it's great to see you again! But just a couple of house rules: no jumping on the furniture, and if you want to draw, please use a piece of paper – you must not write on the walls." He won't mind, and in the long run your sister will be grateful.

I haven't played a musical instrument for years. Five years ago I got a trumpet for my birthday, and I tried to learn it, but I gave up after seven minutes and it ended up in the garage. So here I am, a beginner again.

ONE HOUR

I have everything I need: YouTube trumpet lessons, and a book called *Trumpet for Beginners*. I plan to practice for 20 minutes a day, three times a week. I want to be able to play the trumpet, and I want to do it fast!

TWO HOURS

Well, that was optimistic. Playing the trumpet is more difficult than it looks! I can only play for ten minutes before I start seeing stars and my mouth hurts. I can get from C to G, but I can't get any higher. It's depressing.

FIVE HOURS

I'm now practicing for ten minutes at a time. I can play a whole octave, from C to C. I've watched a lot of trumpet lessons on YouTube. The teacher has a beard and wears very colorful shirts. He's beginning to annoy me, so I'm going to stop watching videos and use books instead.

NINE HOURS

I still can't play high notes. I can play some very simple tunes, but nothing I actually want to play. It isn't Rimsky-Korsakov.

FOURTEEN HOURS

I've been practicing three times a week, but I'm not getting any better. I've put the trumpet in the closet.

FIFTEEN HOURS

One evening, I'm at a school concert and I meet Matilda Lloyd, one of the best trumpet players around – she was a winner in the BBC Young Musician competition in 2014. I ask her for help, and the following week she gives me a trumpet lesson. I'm doing everything wrong. I need to forget everything I learned from the man with the beard and the colorful shirts. I need to start again.

SEVENTEEN HOURS

I'm getting better! My trumpet is starting to sound more like a musical instrument. I'm practicing for half an hour every day. I'm enjoying myself. And the neighbor's dogs have stopped barking.

TWENTY HOURS

I was planning to finish my 20 hours of practice by performing in the subway for an afternoon, but I can't do it. 20 hours is too little. But give me 100 hours, and you'll see me playing the trumpet on a street near you...

Part 1

Interviewer What made you want to become a referee?

Juan My father was a referee, but that didn't influence me – in fact, the opposite because I saw all the problems that he had as a referee. But as a child I was always attracted by the idea, and at school I used to referee all kinds of sports, basketball, handball, volleyball and of course football. I was invited to join the Referee's Federation when I was only 14 years old.

Interviewer Were you good at sports yourself?

Juan Yes, I was a very good handball player. People often think that referees become referees because they're frustrated sportsmen, but this is just not true in most cases in my experience.

Interviewer What was the most exciting match you ever refereed?

Juan It's difficult to choose one match as the most exciting. But I remember some of the Real Madrid-Barcelona matches, for example, the first one I ever refereed. The atmosphere was incredible in the stadium. But really it's impossible to pick just one – there have been so many.

Interviewer What was the worst experience you ever had as a referee?

Juan The worst? Well, that was something that happened very early in my career. I was only 16 and I was refereeing a match in a town in Spain and the home team lost. After the match, I was attacked and injured by the players of the home team and by the spectators. After all these years I can still remember a mother, who had a little

baby in her arms, who was trying to hit me. She was so angry with me that she nearly dropped her baby. That was my worst moment, and it nearly made me stop being a referee.

Interviewer Do you think that there's more cheating in soccer than in the past?

Juan Yes, I think so.

Interviewer Why?

Juan I think it's because there's so much money in football today that it's become much more important to win. Also football is much faster than it used to be, so it's much more difficult for referees to detect cheating.

Interviewer How do soccer players cheat?

Juan Oh, there are many ways, but for me the worst thing in football today is what we call "simulation." Simulation is when a player pretends to have been fouled when in fact he hasn't. For example, sometimes a player falls over in the penalty area when, in fact, nobody has touched him and this can result in the referee giving a penalty when it wasn't a penalty. In my opinion, when a player does this he's cheating not only the referee, not only the players of the other team, but also the spectators, because spectators pay money to see a fair contest.

5.10

Part 2

Interviewer What's the most difficult thing about being a referee?

Juan The most difficult thing is to make the right decisions during a match. It's difficult because you have to make decisions when everything's happening so quickly – football today is very fast. You must remember that everything is happening at 100 kilometers an hour. Also important decisions often depend on the referee's interpretation of the rules. Things aren't black and white. And of course making decisions would be much easier if players didn't cheat.

Interviewer Do you think that the idea of fair play doesn't exist anymore?

Juan Not at all. On the contrary, I think fair play does exist – the players who cheat are the exceptions.

Interviewer Finally, who was the best player you ever saw in your career as a referee?

Juan I have to say Leo Messi.

Interviewer Why do you think he's so good?

Juan Well, a study was done on him which showed that Messi could run faster with the ball than many footballers can do without the ball. But apart from his great ability, what I've always admired about him is that he isn't a typical superstar footballer. In public and in his personal life his behavior has always been very normal. That's unusual for such a famous player.

Rickie You're listening to *The Morning Show* and I'm Rickie Hammond.

Joanna And I'm Joanna Keys.

Rickie Now, I wonder how many of you know what today is? Well, it's Friendship Day! All over the world today, people are celebrating those wonderful people called friends.

We've been doing some research this morning about friends, and we've discovered five fascinating facts about friends for you. Just listen to these. Joanna?

Joanna FRIENDS FACT NUMBER 1

Animals have friends, too! Yes, apparently, we humans aren't the only ones who have friends. There's strong evidence that animals like chimpanzees, horses, elephants, dolphins, and even bats can form friendships for life. And they even make friends with animals that aren't from their species!

Rickie FRIENDS FACT NUMBER 2

We have more real friends thanks to social media! You may find this hard to believe, but since the invention of the internet, and especially since social media came on the scene, we

actually have more real-world friends than before. People always say we're so busy with our online friends that we don't have time for our real friends. But in fact the opposite is true. A doctor in psychology at Sheffield Hallam University has done some research that shows that the internet actually helps us to keep up friendships. And why is that? Because with social media it's easier to stay in touch. In the past we used to lose touch with friends because of distance or lack of time. So now you know...

Joanna FRIENDS FACT NUMBER 3

Having friends at work makes you more productive. Now, you probably think that if you have lots of friends at work, you waste a lot of time gossiping with them. Well, listen to this. According to various studies, having friends at work makes you more productive and more creative. And I can believe that, because you know, if you have friends at work, you're going to be happier, which in turn probably makes you work better. Just one thing though – don't be friends with your boss! That might make your colleagues trust you less, and they might think you got your job because of your friendship.

Rickie FRIENDS FACT NUMBER 4

Love can make you lose two friends. Yes, it's a sad fact that you can lose two friends when you fall in love. According to the anthropologist Robin Dunbar, who's studied the effect that love has on friendship, when a new person comes into your life, he – or she, of course – displaces two other people in your circle of friends. He says that when you're in love, you spend less time with your friends, and this means that friendships deteriorate. And you know something, from my experience that's true.

Joanna FRIENDS FACT NUMBER 5

So this is the last one, and it's good news! Friendship is good for your health. It doesn't matter if you're a man or a woman. People who have a lot of friends are less stressed and live longer. Research shows that you are 50% more likely to have a long life if you have a good social network.

So now we're asking you to choose a song for a special friend. Call us or text us at 800-555-9176. The lines are open now, and our first caller is Mandy from Portland.

Caller Hi, Joanna! Can you play *I'll Be There* for my best friend? Her name's Annie and I love her to pieces...

Part 1

Interviewer So tell me, how did you get involved in the movie, Dagmara?

Dagmara Well, as you probably know, *Schindler's List* was shot in Krakow, in Poland, which is where I live. I was a university student at the time, studying English. And the film company set up their production office here three months before they started shooting the film and I got a job there as a production assistant, preparing and translating documents and the script.

Interviewer But how did you get the job as Steven Spielberg's interpreter?

Dagmara Well, it was a complete coincidence. Just before the shooting started, um, there was a big party in one of the hotels in Krakow for all the actors and the film crew, and I was invited too. When I arrived at the party, the Polish producer of the film came up to me and said, "The woman who was going to interpret for Steven Spielberg can't come, so we need you to interpret his opening speech."

Interviewer How did you feel about that?

Dagmara I couldn't believe it! I was just a student – I had no experience of interpreting – and now I was going to speak in front of hundreds of people. I was so nervous that I drank a couple of glasses of champagne to give myself courage. Um, I must have done a pretty good job though, because soon afterwards Spielberg came up to

me to say thank you and then he said, "I'd like you to be my interpreter for the whole film." I was so stunned I had to pinch myself to believe that this was happening to me.

6.9

Part 2

Interviewer So what exactly did you have to do?

Dagmara I had to go to the film set every day and translate Spielberg's instructions to the Polish actors, and also to the extras. I had to make them understand what he wanted them to do. It was really exciting, and I often felt as if I was a director myself.

Interviewer So, was it a difficult job?

Dagmara Sometimes it was really hard. The worst thing was when we had to shoot a scene again and again because Spielberg thought it wasn't exactly right. Some scenes were repeated as many as 16 times – and then sometimes I would think that maybe it was my fault – that I hadn't translated properly what he wanted, so I'd get really nervous. I remember one scene with lots of actors in it which we just couldn't get right, and Spielberg started shouting at me because he was stressed. Eventually we got it right and then he apologized, and I cried a little, because I was also very stressed – and after that it was all right again.

Interviewer So, was Spielberg difficult to work with?

Dagmara Not at all. I mean he was very demanding, I had to do my best every day, but he was really nice to me. I felt he treated me like a daughter. For instance, he was always making sure that I wasn't cold – it was freezing on the set most of the time – and he would make sure that I had a warm coat and gloves and things.

Interviewer Did you ever get to be an extra?

Dagmara Yes, twice! I was going to be in two party scenes, and I got to wear beautiful long dresses and high heels. Unfortunately, one scene didn't make it to the final cut of the film, and before we started shooting the other one I tripped walking down some stairs and twisted my ankle really badly. I was in so much pain that I couldn't take part in the filming. And that was the end of my "acting career." I still have the photos of me looking like a girl from the 40s, though!

Interviewer Have you ever worked with Spielberg again?

Dagmara Yes. A year later he invited me to interpret for him again, this time during the premiere of *Schindler's List* in Poland, which was broadcast live on national television! Before that, he had also asked me to come to work as a production assistant on his next movie in Hollywood. I was very tempted and thought really hard about it, but I hadn't finished my studies yet, and all my family and friends were in Poland – so in the end I decided not to go.

Interviewer Do you regret it?

Dagmara Not at all. I had my moment, and it was unforgettable, but that was it!

6.19

Danish Sheikh tells me that people with charisma do two basic things. They project their own personality, but at the same time they also make other people feel important. Sheikh's lessons are designed to help me to do both of these things, and in the next 48 hours I learn a lot. Projecting your own personality is difficult to learn. Nobody likes people who talk about how fantastic they are, but nobody remembers people who don't say anything about themselves. Sheikh says the solution is to talk about yourself enough, but not too much.

People with charisma also feel confident. Sheikh gives me advice to help me feel more confident, for example, when I walk into a meeting or a party. He tells me to remember a time in the past when I was successful. This positive memory will stop me from feeling afraid or anxious.

Body language is also important. We practice it together, including how to stand like a gorilla, with your feet apart and your arms wide – this shows that you're an important person. Sheikh also tells me how to enter a room. You have to have your chin up and your shoulders back. He tells me to make eye contact with the people I'm talking to, but not for too long – maximum four seconds – it's important not to stare. We also study hand gestures – you shouldn't use them too much.

Finally, conversation. I learn that it's important not to speak too fast or too slowly. You need to vary your speed to keep your listener's attention. But the most important thing of all is listening carefully. If you show interest in people, it makes them feel special. But if you're not really listening, the person you're talking to notices very quickly, so you need to make sure you really concentrate on what they're saying.

At the end of the two days, I have a test...

6.20

At the end of the two days, I have a test. I go to a club with Sheikh, and I have to talk to strangers. I start talking to people and it goes OK. I don't think people really like it when a stranger starts speaking to them, but we laugh and I have some interesting conversations. Occasionally, Sheikh gives me advice. He reminds me to make eye contact with everyone I'm talking to, and tells me not to cross my arms, that kind of thing.

As we leave the club, we shake hands. He says that the course has been good for me, and he gives me a thumbs up. So have I changed? Am I more charismatic? Not exactly – I'm never going to stand like a gorilla again, for example. But perhaps charisma is simpler than that anyway; it's about understanding who you are better, and showing the best version of yourself.

Week 1

On the first day of week 1, students change their usual school clothes for Chinese-style tracksuits. They start the day much earlier than usual, at 7:00 in the morning, with 30 minutes of physical exercise. In the UK, PE is usually fun, and students only have two hours a week, but in the Chinese system, students have PE every day. Then lessons begin, and students get another shock – all 50 of them are together in one class. In Western countries like the US and the UK, the maximum is usually 30. In China, it's common to have 50 kids in one room. They stop for lunch early, at 11:30. Classes end at 5:00 but they're not allowed to go home. They have dinner at school, and after dinner they still have a lot of homework and self-study. When they finish, at 7:00, they have to clean the classroom. The school day is 12 hours long. Western students find this exhausting!

7.8

Weeks 2 and 3

There are big differences between Chinese and Western teaching styles. The Chinese teachers teach very fast. Everything is done in books and on paper, and there is a lot of copying from the board. In the UK and the US, for example, in science, the approach is to let students do experiments and discover things by themselves, with less help from the teacher.

Discipline is also very different in Western and Chinese schools. In China, the teachers have complete authority, but in the UK, the same teachers are having problems. They're surprised that the students don't take school seriously. When her students don't pay attention, Miss Yang, the science teacher, makes them stand and look at the wall, but it doesn't seem to work very well. As Rosie, one of the students, says, "It probably works in China because everybody does what their teacher says. But here we don't care. We think it's funny." By week three there is a serious problem with discipline. Some students like the Chinese system,

but a lot of others are behaving badly in class, and some students stop coming to class completely. The Chinese teachers are losing control, and realize they need to change the way they are teaching or their students will fail the tests in week four. They start to teach the students about Chinese culture and food, and they add Chinese face-massage to their daily lessons. They also try to teach patience and concentration using traditional Chinese games. During a meeting with the parents, the Chinese teachers try to get them to help and to encourage their children to work hard. The parents are impressed, and the Chinese teachers are filled with new energy and confidence.

7.9

Week 4

During the last week of the experiment, the students in the Chinese class are behaving better. At the end of the week, all the students from the classes with Chinese teachers and the classes with British ones take tests in math, science, and Mandarin. These tests will decide which style of teaching has worked better. So, what do the results show?

On the math test, the students taught by British teachers get an average of 54%, and the class taught by Chinese teachers gets...68%. In science, British-taught students get 50% and Chinese-taught students get...58%. And in Mandarin, British-taught students get 37%, and Chinese-taught students get...46%. The Chinese teachers are delighted, and their students are really grateful and happy.

So, the Chinese teachers get better results, but does that mean their teaching methods are better? Neil Strowger, the principal of the school, says, "It clearly gets good results, but the discipline is too strict for some students." The Chinese teachers agree that their method doesn't help to develop personality or creativity. Perhaps the last word should go to Miss Li, the Mandarin teacher. As she says, "It's very hard to say which system is better... but I think we both learned from each other."

Welcome to the Handel Hendrix house.

Handel's House

In 1712, the German composer George Frideric Handel decided to settle permanently in England, where he was employed as musician to the English court. After living in Surrey for some years, he moved to London and during the summer of 1723, he rented a house at 25 Brook Street. He was the first occupant of the house, but as a foreigner, he was not allowed to buy it. However, after becoming a British citizen five years later, he decided to continue renting the house. In 1742, his annual rent for Brook Street was £50.

The plan of the house on Brook Street was usual for a modest London townhouse of the period. There was a basement containing the kitchens and on the first floor there was a room at the front for receiving visitors. On the second floor there were bigger rooms where Handel entertained and worked. In the largest room, he kept his instruments (a harpsichord and a little house organ) and he occasionally rehearsed there. The room next to it is where he composed many of his most famous works, including the *Messiah*.

The third floor contained the bedroom at the front, with a dressing room at the back where he kept his clothes. In the attic at the top of the house, the servants had their rooms.

During the last decade of his life, Handel's eyesight got worse and by 1754 he was completely blind. He died at his Brook Street house on April 14, 1759. He was buried in Westminster Abbey and more than 3,000 people attended his funeral.

Hendrix's Apartment

Although Jimi Hendrix's career only lasted four years, he is widely regarded as one of the most influential electric guitarists in the history of rock music.

The apartment on the upper floors of 23 Brook Street was found by Jimi's girlfriend Kathy Etchingham, when she saw an ad in one of the London evening newspapers in June 1968, while he was in New York. He moved in briefly in July before returning to the United States for an extensive tour. He spent some time decorating the apartment to his own taste. He bought curtains and cushions from the nearby John Lewis department store, as well as ornaments from Portobello Road market and elsewhere. He told Kathy that this was "my first real home of my own."

In January of the following year, he gave a series of press and media interviews and photo shoots in the apartment. He also appeared on the BBC and gave two concerts in February at the Royal Albert Hall. In March 1969, he went back to New York again and although Kathy stayed at Brook Street for a while longer, Jimi did not live there again. He died in London in 1970, at the age of 27, but in a hotel, not in the Brook Street apartment.

Over the years, his apartment was used as an office until it was taken over in 2000 by the Handel House Trust. It opened to the public on Wednesday, February 10, 2016.

The whole house is now a museum and a concert venue where both men's music can be heard in live performances.

Part 1

Interviewer Today, we're talking to two contestants who appeared on *Dragon's Den*, the UK version of *Shark Tank*. While the business people are called Sharks on the US show, they're called the Dragons on the UK show. So, Jake and Joe, whose idea was it to go on the show?

Joe It was my idea. I applied without telling my business partner Jake. Of course, I never really expected to get on it. But then they called me and said "you're on the show," so that's when I told him.

I Did you spend a long time preparing your pitch?

J Yes. We worked really hard, and we practiced a lot so that we knew the pitch word for word. The evening before the show, we actually went for a run where the show is filmed – just repeating the pitch over and over again.

I How did you feel when you arrived at the Den?

J Um, well, we were told to get to the set at about 11:00 the night before, because you had to prepare everything in advance, like any furniture you need, things like that. It was freezing cold, and we were exhausted – we didn't get back to our hotel until the middle of the night – and a car came to pick us up a few hours later, at 5:30 in the morning.

I What time did you actually do your pitch?

J Um, 11:30. So we were lucky because we were the first on that particular show.

I Why lucky?

J Because we didn't have to wait too long. The other contestants spent a long time just waiting around. Some of them – the ones who are on last – had to wait 12 hours!

I Did you meet the Dragons before you went in to do the pitch?

J No. You're not allowed to. Like, if you go to the bathroom before you go on, someone has to escort you in case you meet a Dragon. So, the first time you see them is when you go into the Den.

8.10

Part 2

I What were the Dragons like?

J Well, they're obviously told by the producers to be really unfriendly and aggressive. So I remember thinking, when the doors opened, and we walked in, what I wanted to do was just to smile at one of them. That was my way of making myself relaxed. And I looked at Deborah Meaden, because she was in the middle, and I

smiled at her, but she just, you know, stared at me, stony-faced, to make me feel nervous. And it worked.

- I Did you think you made a good presentation?
 J Yeah, we did. But Jake, who usually never gets anything wrong, he forgot his first words, and he just never does that. So, we both thought, when he got the introduction wrong, that it was going to go badly, but it didn't.
 I So what happened after you'd made your pitch?
 J Yeah, well, four of the Dragons said, "I'm out." They said they weren't interested. So, we were feeling pretty depressed, pretty negative.
 I And then?
 J The last Dragon was Peter. And he's kind of scary – he's incredibly tall – over six feet. And at first, he really criticized us. But then he told us he had a big chain of camera stores called Jessops and they were starting online printing and photo framing as part of their business. And then he said, "I've got 15 guys in Hong Kong trying to do what you guys are doing, but you guys are doing it better. I'm going to offer you both a job."
 I Were you very surprised?
 J Totally, because it had never happened on the show before. In ten years they'd never offered someone a job.
 I So, he offered you jobs just like that?
 J Well, his offer was that he wanted to have our business, and for us to work with him at Jessops.
 I With a good salary?
 J Very.
 I So, what did you do?

8.11

Part 3

- J It was very stressful because we knew we had to make a decision immediately. So, Jake said, "Yes, let's take the jobs," but I said, "You don't want to work for Jessops." And he stayed silent and I said, "I don't want to work for Jessops." I mean neither of us were in a position where we could have dropped everything and gone and worked for Jessops full-time. It was completely...it was ridiculous.
 I So you said no?
 J That's right.
 I Have you ever regretted saying no?
 J No, not for a second. It was still in the early days for us then, so we were still kind of having fun and enjoying running our own business. And things worked out well for us. Frame Again was successful, and eventually we sold the business this year.
 I But not to one of the Dragons?
 J No, but that would have been perfect!

Hello, and welcome to *How's Business?* Today, we're going to look at how social media can affect businesses. And I'd like to start with the story of Dave Carroll, an American singer-songwriter, who had a very bad experience with United Airlines. Dave and his band were flying with United Airlines from Halifax, in Nova Scotia, to Omaha, in Nebraska, with a stopover in Chicago. As they were waiting to get off the plane in Chicago, they heard another passenger say, "My goodness! They're throwing guitars out there!"
 As Dave and the other band members looked out of the plane window, they were horrified to see that the baggage handlers, who were taking the luggage off the plane, were throwing the band's guitars to each other. They couldn't believe what they were seeing. They immediately complained to United Airlines employees in Chicago, but nobody listened to them.
 When they arrived in Omaha, Dave discovered that the neck of his very expensive Taylor guitar had been broken. It cost him \$1,200 to get it repaired. For nine months, he tried to claim compensation from United Airlines. He called and emailed their offices in Halifax, Chicago, and New York without success. In the end he even suggested that instead of money, they could give him \$1,200 worth of flight tickets. But after all his complaints and suggestions, United simply said "No."
 So, what else could a singer-songwriter do? Dave wrote a song about his experience, and produced a music video to go with it. The song was called *United Breaks Guitars*. He posted it on YouTube and it was a huge hit. The song reached number 1 on the iTunes music store within a week, and the video has had over 16 million views.
 After 150,000 views, United Airlines contacted Dave and offered him a payment if he agreed to take the video off YouTube. He refused, and suggested they give the money to charity. Of course, the impact of Dave's song went far beyond YouTube. Soon newspapers, websites, TV and radio stations all over North America were doing stories about the song. Dave was interviewed on many radio and TV shows where, of course, he retold the story of how *United Breaks Guitars*. He did over 200 interviews in the first three months!
 Dave Carroll's favorite guitar was broken, but in the end United Airlines were the bigger losers. After the video had gone viral, the BBC reported that United Airlines' share price had dropped by 10% within four weeks of the release of the video, which means that the company lost an incredible \$180 million. It would have been much cheaper to repair Dave's guitar!

 The ticket inspector touched my arm. "Listen," he said, "when we get to Peterborough station, run as fast as you can to Platform 1. The Leeds train will be there."
 I looked at him, without really understanding what he had said. "What do you mean?" I said. "Is the train late or something?" "No, it's not late," the ticket inspector said. "I've just radioed Peterborough station. The train is going to wait for you. As soon as you get on, it'll leave. The passengers will complain, but let's not worry about that. You'll get home, and that's the main thing." And he walked away.
 I suddenly realized what an amazing thing he had done. I got up and went after him. I wanted to give him everything I had, all the money in my wallet – but I knew he would be offended. I grabbed his arm. "I, uh, just wanted to..." but I couldn't continue.
 "It's OK," he said. "No problem."
 "I wish I had a way to say thank you," I said. "I really appreciate what you've done."
 "No problem," he said again. "Listen, if you want to thank me, the next time you see someone in trouble, help them. That will pay me back. And tell

them to do the same to someone else. It'll make the world a better place."
 When the train stopped, I rushed to Platform 1 and sure enough the Leeds train was there waiting, and a few hours later I was with my mum in hospital. Even now, years later, whenever I think of her, I remember the Good Ticket Inspector on that late-night train to Peterborough. It changed me from a young man who was nearly a criminal into a decent human being. I've been trying to pay him back ever since then.

Story 1

When I was seven, my family was on vacation in the US and one day we drove to the Grand Canyon. The car window was open, and at one point, my favorite blanket flew out the window and was gone. I was devastated. It was my security blanket and I couldn't sleep without it. Soon after, we stopped for gas at a service station. I was sitting in the car feeling miserable eating a sandwich when a biker gang, you know, a group of guys on motorcycles in leather jackets, drove into the gas station. A huge, frightening man with a gray-and-black beard got off his bike and came to the car. He knocked on the window and then pulled my blanket from his jacket pocket and handed it to my mom. He then went back to his motorcycle. I was so happy I ran up to him and gave him my sandwich.

Story 2

This happened about 20 years ago, but the memory is still really vivid. I was recently married, my wife was pregnant, and we had very little money because I only had a part-time job. It was a few days before payday and I went to a food store to get only what we absolutely needed. In all, I bought about \$10 worth of stuff. At the checkout, I swiped my debit card. The cashier said, "Sorry. It says 'Declined'. Try again." I asked her to take one item out of the basket, and then I swiped again. There was now a line of customers behind me. The cashier, said, "Sorry. Declined again." I went on taking things out until the only thing I had left was a loaf of bread, and then the card was accepted. I took my bread and I left – I was feeling absolutely humiliated. A few seconds later I heard the voice of a little girl behind me, a girl who was standing with her mother right behind me in the line. She gave me a grocery bag full of all the things I'd put back. Her mother had bought them for me. I still cry when I remember that moment and think how such a small act can mean so much for a person in need.

Story 3

I'm a painter and a couple of years ago I was traveling by plane to see friends and I'd taken my painting things with me. I forgot about the rules about not being able to take liquids in carry-on bags, so when I got to security at the airport, the man took away all my paints. I was really angry with myself for being so stupid. But when I came back a week later, the security man was there at the baggage claim area with my paints. Not only had he kept them for me, but he'd also looked up the date and time of my return flight so that he could be there to meet me.

Technology addiction is real, and it's creating mental health problems all over the world. According to a recent survey, six out of ten Americans report that they are addicted to their digital devices. So it's no surprise that the idea of a "digital detox" is growing in popularity. But what is it actually like to go on one?
 Time to Log Off is an organization that runs three-day digital detoxes in many different locations around the world. People who go on them are not allowed to use digital devices at all for three days. Journalist Anna Magee felt she was addicted to her smartphone, so when she read about the detoxes, she decided to go on one.
 "When I arrived, the first thing I discovered was that there was no cell phone coverage so I couldn't

even cheat if I wanted to! Suddenly I felt cut off and panicky. What if something happened to my husband? What if something terrible happened in the world?

There were eight other people on the detox with me. At 6 p.m. we met in the living room and handed in our devices, our phones or tablets or whatever. People looked scared. I was worried there was going to be lots of lectures on psychology, things like that, but no. Instead, there was yoga, and walks through the countryside where we picked fruit and had lots of conversations with real-life humans. The first night I slept really well for the first time in months.

But it wasn't always easy. The second evening without my phone, I felt really disconnected and lonely. At yoga that night, I burst into tears, and I felt awful not being able to call a friend. But by the third and final day I'd changed. When we went on our walk, I really noticed the beauty of the countryside. And I was able to sit still on the sofa, reading a book for nearly half an hour without losing concentration. I started coloring in pictures in books. I was even eating more slowly, in a more relaxed way.

At lunchtime the next day, we got our devices back, and said goodbye. When I finally managed to get coverage, I hungrily checked my phone for messages, likes, comments, news. But nothing had really happened. I managed the whole two-hour train trip back without checking my phone again, just noticing the countryside instead.

It's now three weeks since I went on the detox and though I can't quite believe it, I've managed to control my use of technology. I have one full day unplugged each week, on Saturdays, and I feel incredibly rested on Sundays as a result. I don't read email after 8 p.m., and that really helps me to sleep. I know they're tiny steps, but I feel that I've changed. When I'm talking to friends I feel that I'm much more present. I'm really focusing on them and not getting distracted by my phone. And I find that when I have a break, instead of wanting to scroll through Twitter or check WhatsApp, what I really want is real-life conversation."

1 The Tiffany lamp

Louis Comfort Tiffany was an artist and designer who specialized in decorative arts like glass design, jewelry making, and metalwork. He began his career as a painter and he studied under George Inness and Samuel Colman. But then he became interested in glassmaking. In 1882, US president Chester Alan Arthur asked Tiffany to redesign a number of rooms in the White House. Tiffany repainted walls, changed wall paper, and added beautifully colored stained glass to gas lamps and windows throughout the house.

After this, Tiffany then turned his attention to designing common home objects like lamps and vases. In 1893, he exhibited some of his stained-glass lamps at The World's Fair in Chicago. Soon after, he started producing the lamps commercially. His lamps and other home products were handmade by skilled craftsmen and they had complicated designs inspired by nature, including insects, flowers, and tree leaves. With his innovative designs, he became one of the leaders of the Art Nouveau movement. His beautiful lamps were popular with homeowners of the time and they are still considered an iconic American design today.

2 The Ford F-Series pick-up truck

The F-Series pick-up truck, introduced in 1948, was the first post-World War II truck designed by the Ford Motor Company. It had several innovations, for example it had a wide cab for the driver and new options like a windshield washer. Ford F-Series trucks were very popular with Americans looking for a reliable, but stylish vehicle to carry heavy loads or help with work on the farm. Over the years, the Ford F-Series has been redesigned 13 times including making it bigger, faster, more luxurious, and even fitting it with a special bed to sleep in. The latest Ford F-Series trucks are now made of lightweight aluminum. The original trucks were

made of heavy and more expensive steel. This iconic American pick-up truck has been the best-selling vehicle in the United States since 1986—that's more than 30 years. It's difficult to stay at the top of the US auto industry, but Ford has found a way with the F-Series' classic design and reliability.

3 The Barbie doll

Until the late 1950s, most American girls played with baby dolls, which often limited their imaginations. They only played the role of being mothers. At around the same time, Ruth Handler noticed that her young daughter was playing with paper dolls, giving them adult roles such as actresses or secretaries. On a trip to Europe, Ruth saw a doll with an adult figure in Germany. Handler had the idea that girls could expand their imagination and play-acting roles with a doll that looked like an adult. So she and engineer Jack Ryan redesigned the doll for the US market and called her Barbie. The first Barbie dolls were produced in 1959 and sold over 350,000 in the first year. Barbie is still popular today, and billions have been sold around the world since 1959. Mattel, Inc. the company that produces Barbie, reports that 90 percent of American girls between the ages of three and ten have a Barbie doll.

4 The Love sculpture

In 1965, artist Robert Indiana had an idea for a painting with the word "LOVE" as the main focus. He decided to break the word up into two lines, putting the "LO" on top of the "VE." He then changed the angle of the "O" a little, and an iconic American design was born. In fact, it became so popular that the Museum of Modern Art and the United States Postal Service asked the artist to create versions of his "LOVE" painting for cards and stamps. In the early 1970s, Indiana made a series of "LOVE" sculptures for display in public parks. The first of these "LOVE" sculptures was placed in New York City, on the corner of Sixth Avenue and Fifty-fifth Street. Other "LOVE" sculptures were placed in New Orleans, Philadelphia, Vancouver, Tokyo, and Singapore, as well as many other cities. Unfortunately, Robert Indiana didn't make much money from his "LOVE" paintings and sculptures. He never signed his paintings or applied for copyright, so he didn't have legal protection against the many imitations of his work.

Interviewer Good morning and thank you for coming, Mr. Morton – or should it be Detective Morton – you were a detective with Scotland Yard, weren't you?

Detective Morton Yes, that's right. For 25 years. I retired last year.

Interviewer People today are still fascinated by the identity of Jack the Ripper, over 130 years after the crimes were committed. It's incredible, isn't it?

Detective Morton Well, it's not really that surprising. People are always interested in unsolved murders – and Jack the Ripper has become a sort of cult horror figure.

Interviewer So what can you tell us about some of the new theories about his identity?

Detective Morton Well, a recent new theory was put forward by a crime historian named Jan Bondeson. He thinks that Jack the Ripper was a Dutch sailor named Hendrik de Jong.

Interviewer What evidence does he have?

Detective Morton Well, de Jong was definitely a murderer. He killed four women in Holland and Belgium, including two of his ex-wives. He also traveled to London a lot, and he was there when the Jack the Ripper murders took place. He also matches the descriptions we have of Jack the Ripper.

Interviewer How credible is his theory?

Detective Morton Well, even Dr. Bondeson says that it's impossible to know for certain if de Jong was Jack the Ripper. I would say it's possible, but there isn't really enough conclusive evidence.

10.8

Part 2

Interviewer The next recent theory I'm interested in comes from the movie director Bruce Robinson, who wrote a book in 2016 called *They All Love Jack*. What can you tell us about it?

Detective Morton Bruce Robinson is convinced that Jack the Ripper was in fact Michael Maybrick, the brother of one of the original suspects, James Maybrick. He thinks that the style of the murders indicates that there was a connection with the Freemasons - which both brothers were.

Interviewer What did Michael do?

Detective Morton He was a popular singer and composer of songs at the time, and Robinson thinks that the Ripper's letters are similar in style to some of his songs, and the fact that they were posted from so many different parts of the UK makes sense because Michael was on tour at the time. Robinson thinks he was a psychopath, and was responsible for at least 16 more murders that took place in England later. He even thinks that Michael went on to murder his brother James.

Interviewer But he was never arrested, was he?

Detective Morton No, he wasn't. However, Bruce thinks that by 1893 the police had begun to suspect him, but because many of the police themselves were Freemasons they allowed him to escape to the Isle of Wight, where he lived for the rest of his life.

Interviewer And what do you do think?

Detective Morton I think the book is well researched, but I don't really believe his conspiracy theory, that the police knew it was Michael and let him get away. I think the reason the Ripper was never caught was because the police were incompetent, not corrupt.

10.9

Part 3

Interviewer Finally, let's talk about Patricia Cornwell's research. In her 2002 book *Jack the Ripper – Case Closed* she said that she had identified the murderer and that she was convinced that Jack the Ripper was in fact Walter Sickert, the painter. What evidence did she put forward to support this claim?

Detective Morton Well, she mainly used DNA analysis. She actually spent over \$2.5 million buying 32 paintings by Sickert. She cut up one of them to get the DNA from it – people in the art world were furious.

Interviewer I can imagine.

Detective Morton And then she compared the DNA from the painting with DNA taken from the letters that Jack the Ripper sent to the police. Patricia Cornwell said that she was 99% certain that Walter Sickert was Jack the Ripper.

Interviewer And now she's written a new book with more evidence.

Detective Morton Yes, it's called *Ripper: the Secret Life of Walter Sickert*. She says she's found new evidence, including letters that were written by Jack the Ripper and by Walter Sickert on the same very unusual type of paper. She also points out that some of his paintings are very violent and frightening.

Interviewer But you don't think she's right, do you?

Detective Morton Well, I think she might be right. She has a lot of evidence, although I don't think it's completely reliable. And a lot of people think she's wrong!

Interviewer So, who do you think the murderer was?

Detective Morton I can't tell you because I don't know.

Interviewer Do you think we'll ever solve the mystery?

Detective Morton Yes, I think one day the mystery will be solved. Some new evidence will appear that proves 100% who Jack the Ripper was, and we'll be able to say that the case is finally closed. But right now it's still a mystery, and people like a good mystery.

- The negative infinitive = *not to + verb*.
- These common verbs can take either the infinitive or gerund with no difference in meaning: *start, begin, continue*.

"I may be late."	He said (that) he might be late.	
"I must go."	She said (that) she had to go.	

- We use reported speech to report (i.e., to tell another person) what someone said.
- When the reporting verb (*said, told, etc.*) is in the past tense, the tenses in the sentence that is being reported usually change like this:
 present → past
 will → would
 simple past / present perfect → past perfect

When tenses don't change

When you report what someone said very soon after they said it, the tenses often stay the same as in the original sentence.

Adam "I **can't come** tonight."

*I've just spoken to Adam and he said that he **can't come** tonight.*

Jack "I **really enjoyed** my trip."

*Jack told me that he **really enjoyed** his trip.*

- Some modal verbs change, e.g., *can* → *could*, *may* → *might*, *must* → *had to*. Other modal verbs stay the same, e.g., *could*, *might*, *should*, etc.
*"I might come back next week." He said he **might** come back next week.*
- We usually have to change the pronouns.
*"I like jazz." Jane said that **she** liked jazz.*
- Using *that* after *said* and *told* is optional.

- If you report what someone said on a different day or in a different place, some other time and place words can change, e.g., *tomorrow* → *the next day*, *here* → *there*, *this* → *that*, etc.
*"I'll meet you **here tomorrow**." He said he'd meet me **there the next day**.*

say and tell

Be careful – after *said*, don't use a person or an object pronoun.

Sarah said that she was tired. NOT Sarah said me that she was tired.

- When a question doesn't begin with a question word, we add *if* (or *whether*).
*"Do you want a drink?" He asked me **if / whether** I wanted a drink.*
- We also have to change the word order to subject + verb and not use *do / did*.

Would you have gone to the party if you'd known Lisa was there?

You wouldn't have lost your job if you hadn't been late every day.

relative clauses: defining and nondefining

defining relative clauses (giving essential information)

- 1 Harper Lee is the woman **who** (that) wrote *To Kill a Mockingbird*. ▶ 10.1
I'm looking for a book **that** (which) teaches you how to relax.
That's the house **where** I was born.
- 2 Is Frank the man **whose** brother plays for the Lakers?
It's a tree **whose** leaves change color in the fall.
- 3 I just got a text from the girl (**who** / **that**) I met on the flight to Paris.
This is the phone (**that** / **which**) I bought yesterday.
- We use a defining relative clause (= a relative pronoun + verb phrase) to give essential information about a person, place, or thing.
- 1 We use the relative pronoun **who** / **that** for people, **that** / **which** for things / animals, and **where** for places.
- That** is more common than **which** in defining clauses.
- 2 We use **whose** to mean "of who" or "of which."
- 3 In some relative clauses, the verb after **who**, **which**, or **that** has a different subject, e.g., *She's the girl who I met on the train* (the subject of *met* is *I*). In these clauses, **who**, **which**, or **that** can be omitted.
She's the girl I met on the train.
- where** and **whose** can never be omitted. **NOT** *Is that the woman dog barks?*
 - We can't omit **who** / **which** / **that** / **where** if it's the same subject in both clauses. **NOT** *Julia's the woman works in the office with me.*

nondefining relative clauses (giving extra nonessential information)

- This painting, **which** was painted in 1860, is worth millions of dollars. ▶ 10.2
Last week I visited my aunt Jane, **who's** nearly 90 years old.
Burford, **where** my grandfather was born, is a beautiful little town.
My neighbor, **whose** son goes to my son's school, has just remarried.

- We use a nondefining relative clause to give extra (often nonessential information) in a sentence. If this clause is omitted, the sentence still makes sense.
This painting, which was painted in 1860, is worth millions of dollars.
- Nondefining relative clauses must go between commas (or a comma and a period).
- In these clauses, we **can't** leave out the relative pronoun (**who**, **which**, etc.).
- In these clauses, we **can't** use **that** instead of **who** / **which**.
NOT *This painting, that was painted in 1860, is worth millions of dollars.*

a Complete with **who**, **which**, **that**, **where**, or **whose**.

- Minneapolis is the city **where** Prince was born.

 - That man _____ you saw at the party was my boyfriend!
 - That's the park _____ I learned to ride a bike.

2 MAKING ADJECTIVES AND ADVERBS

Adjective prefixes and suffixes

We often make adjectives from nouns by adding a suffix. Some common suffixes are: -y, e.g., sun – sunny; -ate, e.g., passion – passionate; -able / -ible, e.g., fashion – fashionable; -ful, e.g., use – useful. Nouns that end in -ence often make the adjective with -ent, e.g., violence – violent.

To make a negative adjective, we usually add a prefix, e.g., un-, im-, etc. (See **Vocabulary Bank Personality, p.153.**) However, some adjectives that end in -ful make the negative by changing the suffix -ful to -less, e.g., useful – useless, hopeful – hopeless.

a Look at the adjectives and adverbs from the noun **luck** in the chart below. Complete the chart.
